(2) adjust the correlative rights and opportunities of each owner of gas in a common reservoir to produce and use or sell the gas as permitted in this chapter.

(b) When, as provided in Subsection (b) of Section 85.046 or Subsection (b) of Section 86.012 of this code, as amended, the commission has permitted production by commingling oil or gas or oil and gas from multiple stratigraphic or lenticular accumulations of oil or gas or oil and gas, the commission may prorate, allocate, and regulate the production of such commingled, separate multiple stratigraphic or lenticular accumulations of oil or gas or oil and gas as if they were a single common reservoir; provided, however, that:

(i) the commingling and distribution, proration, apportionment, or allocation of separate accumulations with commission established discovery dates after January 1, 1940, and prior to June 1, 1945, shall not serve to expand, add to, or extend the vertical or areal extent of any single common reservoir;

(ii) such commingling shall not cause the allocation of allowable production from a well producing from any separate accumulation or accumulations to be less than that which would result from the commission applying the provisions of Section 86.095 of this code to such accumulation or accumulations;

(iii) the allocation of the allowable for such commingled production shall be based on not less than two factors which the Railroad Commission shall take into account as directed by Section 86.089 of this code; and

no gas well in any field falling within the classification under Subdivision (i) above where commingled separate accumulations of gas are being prorated under the authority granted by this Subsection (b) shall be assigned an allowable in excess of its production during the most recent production period reported to the commission and in the absence of any reported production the assigned allowable shall not exceed the open-flow potential of such well as reported to the commission; provided, however, that the commission may, if it finds special conditions require such, make a greater assignment.

§ 86.082. Exercise of Authority to Prevent Waste

The commission shall exercise its authority to prevent waste when the presence or imminence of waste is supported by a finding based on the evidence introduced at a hearing after proper notice.

§ 86.083. Exercise of Authority to Adjust Correlative Rights and Opportunities

The commission shall exercise its authority to adjust correlative rights and opportunities of each owner of gas in a common reservoir to produce and use or sell the gas when evidence introduced at a hearing after proper notice will support a finding made by the commission that the aggregate lawful volume of the open flow or daily potential capacity to produce of all gas wells located in a common reservoir is in excess of the daily reasonable market demand for gas from gas wells that may be produced from the common reservoir, to be used as permitted in this chapter.

§ 86.084. Determination of Status of Production

(a) The commission shall determine the status of gas production from all reservoirs in the state.

(b) If the commission finds that waste exists or is imminent in the production of gas from a reservoir, or that the capacity of the wells to produce gas from a reservoir exceeds the market demand for gas from the reservoir, the commission by proper order shall prorate and regulate the gas production from the reservoir on a reasonable basis.

§ 86.085. Determination of Demand and Volume
On or before the 20th day of each month, the commission, after notice and hearing, shall determine:

(1) the lawful market demand for gas to be produced from each reservoir during the following month; and
(2) the volume of gas that can be produced without waste from the reservoir and each well in the reservoir during the following month.

[Acts 1977, 65th Leg., p. 2534, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.086. Monthly Reservoir Allowable
After determining demand and volume of production as provided in Section 86.085 of this code, the commission shall fix the monthly reservoir allowable of gas to be produced from the reservoir at the lawful market demand for the gas or at the volume that can be produced from the reservoir without waste, whichever is the smaller quantity.

[Acts 1977, 65th Leg., p. 2535, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.087. Monthly Well Allowable
The monthly reservoir allowable shall be allocated among all wells entitled to produce gas from the reservoir to give each well its fair share of the gas to be produced from the reservoir, but each well is restricted to the amount of gas that can be produced from it without waste. The volume of gas allocated to each well is the monthly allowable for that well.

[Acts 1977, 65th Leg., p. 2535, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.088. Daily Allowable
The daily market demand for gas and the daily allowable shall be determined by dividing the monthly demand and the monthly allowable by the number of days in the month.

[Acts 1977, 65th Leg., p. 2535, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.089. Factors in Determining Allowable
(a) In determining the daily allowable production for each gas well, the commission shall take into account:

(1) the size of the tract segregated with respect to surface position and common ownership on which the gas well or wells are located;
(2) the relation between the daily producing capacity of each gas well and the aggregate daily capacity of all gas wells producing the same kind of gas in the same common reservoir or zone; and
(3) other factors that are pertinent.
(b) In determining the daily allowable production for each gas well, the commission shall not take into account the size of the tract on which any gas well or wells are located in excess of the efficient drainage area of the well or wells, producing at 25 percent of the daily productive capacity. The drainage area shall be determined by the commission.

(c) In ascertaining the drainage area of a well, the commission shall take into account such factors as are reflected in the productive capacity of a gas well, including formation pressure, the permeability and porosity of the producing formation, and the well bore's structural position, together with all other factors taken into account by a reasonably prudent operator in determining the drainage area for a gas well.

[Acts 1977, 65th Leg., p. 2535, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.090. Authorizing Overproduction and Underproduction
(a) In order to adjust the correlative rights and opportunities of each owner to produce, use, and sell gas from a common reservoir from which a portion of the market demand is seasonal or where a portion of the market demand fluctuates from month to month, the commission may permit the wells in the reservoir to be produced in excess of the monthly allowable, in accordance with the conditions and limitations set forth in Subsections (b), (c), and (d) of this section, if no waste is caused.

(b) No well may be permitted in any one month to produce:

(1) at a rate in excess of 25 percent of the daily producing capacity of the well as found by the commission; or
(2) in excess of two times its monthly allowable, except that if on application to the commission there is shown to exist, or there is threatened and unforeseen, an emergency requiring an increase in the demand for the gas from the reservoir which cannot be satisfied otherwise from the reservoir, then the wells under the application may be produced as authorized in this subchapter but not in excess of four times each of the well’s monthly allowable.

(c) No well may ever be allowed to produce in excess of twice its allowable for more than two months in any period of six months beginning on the first day of March and September of each year. If a well has produced twice its allowable or more during a period of six months beginning on the first day of March or September, it shall be closed in until its production and allowable are in balance.

(d) On the first day of March and September of each year, the commission shall restrict production from all wells that are then overproduced to the fractional part of their monthly allowable that will bring the accumulated allowables and the accumulated monthly production in balance during the next six months. If the overproduction is not balanced during that six-month period, the overproduced well shall be shut in until its production and allowable are in balance.
(e) The commission by appropriate order may permit a gas well to be underproduced for a period of six consecutive months and may allow the accumulated underproduction to be produced in addition to the regular monthly allowable during the following six-month period.

§ 86.091. Minimum Limits on Well Restrictions

(a) None of the provisions of this chapter require that the production from a gas well with a daily natural open flow of 200,000 cubic feet of gas or more be restricted to a quantity less than 50,000 cubic feet of gas daily.

(b) None of the provisions of this chapter require that the production from a gas well with a daily natural open flow of less than 200,000 cubic feet of gas be reduced to a quantity less than 25 percent of its natural open flow.

§ 86.092. Maximum Well Production

(a) In a common reservoir producing both sweet and sour gas, no gas well may be permitted to produce in excess of 25 percent of its daily productive capacity except as provided in Subsection (b) of this section.

(b) If the commission finds that reservoir conditions require that the percentage be increased to prevent waste and that the increase will not create a drainage condition between sweet and sour gas land, the commission may authorize an increase in the allowable production.

(c) If the allowable production previously allocated to a well is more than 15 percent of its daily producing capacity and the commission finds that the production of its daily allowable from the well will cause waste due to the intermingling of sweet and sour gas, the commission may order the production from the well restricted to 15 percent of its daily producing capacity. This subsection shall not be construed to militate against the right of the owner to furnish his take ratably from all these wells in order to supply his demand for gas, provided that notice of the increase and the amount of the increase are given to the commission within five days; and provided further, the commission, at its next hearing, shall adjust the inequality of withdrawals caused by the increase in fixing the allowable production of the various wells in the common reservoir or zone.

§ 86.093. Effect of Oil and Gas Stratum on Gas Only Stratum

If gas is produced from one stratum and oil and gas are produced from another stratum in the same well bore, the commission shall taken into account the amount of gas produced from the oil stratum in determining the amount of gas that may be produced from the stratum producing gas only. The commission may subtract the amount of the casinghead gas produced from the dry gas that would be allocated to the well if it produced dry gas and may restrict the dry gas production accordingly.

§ 86.094. Authority to Increase Take Above Allowable

If unforeseen contingencies increase the demand for gas required by a distributor, transporter, or purchaser to an amount in excess of the total allowable production of the well to which he is connected, the distributor, transporter, or purchaser may increase his take ratably from all these wells in order to supply his demand for gas, provided that notice of the increase and the amount of the increase are given to the commission within five days; and provided further, the commission, at its next hearing, shall adjust the inequality of withdrawals caused by the increase in fixing the allowable production of the various wells in the common reservoir or zone.

§ 86.095. Zoning Common Reservoirs

(a) The commission shall zone a common reservoir if, on consideration of the evidence introduced at a hearing, it finds that either the prevention of waste or adjustment of correlative rights and opportunities, or both, as designated in Section 86.081 of this code, may be accomplished more adequately by zoning the common reservoir.

(b) If the commission zones a common reservoir, each zone shall be regarded as a separate common reservoir in making allocations of daily allowable production as provided in this chapter.

(c) If the commission zones a common reservoir, the commission:

1. shall allocate to each zone its just proportion of the market demand for gas from the common reservoir;
2. shall establish appropriate rules applicable to each zone;
3. may adjust its orders to the practicable conditions that exist; and
4. may enter any reasonable order necessary to effectuate the purposes of this chapter.

(d) The commission may segregate a sour gas area from a sweet gas area and is not required to restrict the allowable production of the sour gas zone to the same percentages that may be produced from the sweet gas zone.

§ 86.096. Failure to Use or Sell Allowable Production

If the commission finds that the owner of a gas well failed or refused to use or sell the allowable production from his well when the owner was offered a connection or market for the gas at a reason-

able price, the well shall be excluded from consideration in allocating the daily allowable production from the reservoir or zone in which it is located until the owner of the well signifies to the commission his desire to use or sell the gas. In all other cases, all gas wells shall be taken into account in allocating the allowable production among wells producing the same type of gas.

[Acts 1977, 65th Leg., p. 2537, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.097. Production of Gas From Oil Well
No person in possession of or operating an oil well may produce from the oil well gas found in a horizon productive of gas only.

[Acts 1977, 65th Leg., p. 2537, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

SUBCHAPTER E. METER AND PRESSURE TESTS

§ 86.141. Duty to Test Pressure
All persons producing gas from any gas well shall determine through appropriate tests during the months of January and July of each year the open flow and rock pressure of each gas well from which gas is produced.

[Acts 1977, 65th Leg., p. 2538, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.142. Pressure Test Requirements
The test to determine pressure of a gas well shall be made:

(1) under uniform and generally recognized methods;
(2) in the presence of and under the supervision of a representative of the commission; and
(3) under rules prescribed by the commission.

[Acts 1977, 65th Leg., p. 2538, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.143. Pressure Test Reports
(a) Verified reports of the tests to determine pressure shall be filed with the commission on or before the 10th day of each January and July.

(b) The reports shall disclose the name of the representative of the commission who was actually present when the tests were made.

(c) The reports are a permanent public record. They shall be kept on file with the commission and shall be open to the inspection and examination of the public.

[Acts 1977, 65th Leg., p. 2538, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.144. Demanding Second Test
A person producing gas from the same common reservoir who is dissatisfied with the test as made and reported may demand that a second test be made in the manner provided in this subchapter and in the presence of the person making the demand or his representative.

[Acts 1977, 65th Leg., p. 2538, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.145. Duty to Test Meter
The commission shall require one of its duly authorized agents to inspect, read, or test any meter or meters through which gas is being measured or gauged on the request of a lessor, lessee, operator, or royalty owner from whose land, lease, or royalty interest gas is being produced.

[Acts 1977, 65th Leg., p. 2538, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

[Sections 86.146 to 86.180 reserved for expansion]

SUBCHAPTER F. USE OF GAS

§ 86.181. Use of Sweet Gas Produced From Gas Well
No sweet gas produced from a gas well may be used for any purpose except:

(1) light or fuel;
(2) efficient chemical manufacture, other than the manufacture of carbon black, provided that sweet gas produced from wells located in a common reservoir producing both sweet and sour gas may be used for the manufacture of carbon black if it is used in a plant producing an average recovery of not less than five pounds of carbon black to each 1,000 cubic feet of gas;
(3) bona fide introduction of gas into oil or gas bearing horizon in order to maintain or increase the rock pressure, or otherwise increase the ultimate recovery of oil or gas from the horizon; and
(4) the extraction of natural gasoline when the residue is returned to the horizon from which it is produced.

[Acts 1977, 65th Leg., p. 2539, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 86.182. Use of Sour Gas
In addition to the purposes for which sweet gas produced from a gas well may be used, sour gas may be used for efficient chemical manufacturing purposes including the manufacture of carbon black provided:

(1) it is utilized in a plant producing a recovery of not less than one pound of carbon black to each 1,000 cubic feet of gas; and
(2) the gasoline content is removed and saved from the sour gas before the gas is used for carbon black.

[Acts 1977, 65th Leg., p. 2539, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]
§ 86.183. Use of Casinghead Gas

Casinghead gas may be used for any beneficial purpose, which includes the manufacture of natural gasoline.

§ 86.184. Use as Gas Lift

(a) A producer of either sweet or sour gas or casinghead gas may use the gas as gas lift in the bona fide production of oil if the gas is not used in excess of 10,000 cubic feet per barrel of oil produced.

(b) To prevent waste in a case where the facts in the case warrant it, the commission may permit the use of additional quantities of gas to lift oil provided:

  (1) all the gas used in excess of 10,000 cubic feet for each barrel of oil is processed for natural gasoline; and

  (2) the residue is burned for carbon black when it is reproduced.

§ 86.185. Prohibition Against Gas in Air

No gas from a gas well may be permitted to escape into the air after the expiration of 10 days from the time the gas is encountered in the gas well, or from the time of perforating the casing opposite a gas-bearing zone if casing is set through the zone, whichever is later, but the commission may permit the escape of gas into the air for an additional time if the operator of a well or other facility presents information to show the necessity for the escape; provided that the amount of gas which is flared under that authority is charged to the operator’s allowable production. A necessity includes but is not limited to the following situations:

  (1) cleaning a well of sand or acid or both following stimulation treatment of a well; and

  (2) repairing or modifying a gas-gathering system.

[Sections 86.186 to 86.220 reserved for expansion]

SUBCHAPTER C. PRODUCTION OF SOUR GAS
§ 87.051. Limitation of Sour Gas Production
No person may produce sour gas from any sour gas well in a reservoir producing both sweet and sour gas in excess of the daily allowable production for the gas well as fixed by the orders and schedules of the commission. The rate of production from a sour gas well is considered to be the daily average rate of production for the calendar month.

§ 87.052. Maximum Production of Sour Gas for Carbon Black Manufacture
(a) In any common reservoir in the state producing both sweet and sour gas, there shall never be produced from the common reservoir for use in carbon black manufacture a maximum daily volume of sour gas from the gas wells in excess of 750 million cubic feet.
(b) The commission shall prorate the daily volume of sour gas from gas wells among all the sour gas wells to prevent cognizable and preventable drainage of gas from tracts of land in the sour gas producing area segregated as to surface position and common ownership on which the sour gas wells are located.

§ 87.053. Effect of Demand Below Maximum Allowable Production
(a) If the daily demand for sour gas from gas wells for use in carbon black manufacture is less than the daily maximum allowable permitted in Section 87.052 of this code, the total daily volume of gas from gas wells from the sour gas area for use in carbon black manufacture shall be equal to the daily demand.
§ 87.054. Effect of Demand for Other Purposes Than Carbon Black Manufacture

(a) If a lawful daily demand exists for sour gas from gas wells for purposes of utilization permitted by law, other than the manufacture of carbon black, the additional demand shall be added to the daily demand for carbon black manufacture, and that sum shall constitute the daily volume of sour gas from gas wells that may be withdrawn from the common reservoir for utilization.

(b) The commission shall prorate the daily volume provided for in Subsection (a) of this section among the sour gas wells in the area on the basis set forth in Section 87.052 of this code.

[Sections 87.055 to 87.090 reserved for expansion]

SUBCHAPTER D. PLANTS EXTRACTING NATURAL GASOLINE

§ 87.091. Prohibited Commingling of Gas

In a plant for the extraction of natural gasoline content of gas, no sweet gas may be commingled with sour gas and no casinghead gas may be commingled with sweet gas or sour gas or both, except on the conditions and requirements stated in this subchapter.

§ 87.092. Permit Required

In any common reservoir in this state producing both sweet and sour gas, no person may operate a plant for the extraction of the natural gasoline content of gas in which sweet gas and sour gas are commingled, or plant casinghead gas is commingled with either sweet gas or sour gas or both, until the person secures from the commission a permit authorizing the operation of the plant.

§ 87.093. Issuance of Permit

The commission shall issue a permit if it appears that the plant is being operated and the residue gas from the plant is and will be disposed of in accordance with the provisions of this subchapter.

§ 87.094. Cancellation of Permit

(a) If it appears to the commission that a plant is operating in violation of any of the provisions of this subchapter, the commission shall cancel the permit issued to the plant.

(b) After the cancellation of the permit, no operator of the plant may commingle either sweet gas and sour gas or casinghead gas with sweet gas or sour gas in the plant for the purpose of extracting the natural gasoline content.

§ 87.095. Residue Gas Allowed in Air

(a) Except as provided in Subsection (b) of this section, if a plant operating under this subchapter commingles casinghead gas with sweet gas or sour gas or both, the operator of the plant shall not blow, or permit to be blown, in the air any of the residue gas remaining after the gasoline content of the gas is extracted.

(b) The operator of a plant may blow in the air an amount of residue gas from the plant that is determined by the commission to be necessary to accomplish uninterrupted deliveries in required amounts to carbon black plants for carbon black manufacture.

§ 87.096. Residue Gas: Determination by Commission

If a plant operating under this subchapter commingles casinghead gas with sweet gas or sweet gas with sour gas, the commission shall ascertain:

(1) the quantity of residue gas required to be used for fuel purposes in the efficient operation of the plant; and

(2) the quantity of residue gas required to be returned by the operator of the plant to the leases to which the plant is connected for use as fuel in the operation of the leases.

§ 87.097. Use of Residue Gas for Other Purposes

(a) The operator of the plant is required to use, or cause to be used, for one or more of the uses provided for sweet gas by law a quantity of the residue gas from the plant equal to the quantity of sweet gas taken into the plant for processing, less the extraction loss from the processing.

(b) The operator shall not be credited with use of residue for plant-fuel or lease-fuel operations in an amount in excess of the quantity of the residue gas found by the commission to be necessary for the efficient operation of the plant and return to the leases for fuel for lease operations.

[Sections 87.098 to 87.130 reserved for expansion]
§ 87.131. Use of Sweet Gas for Carbon Black Manufacture

Sweet gas produced from any gas well in this state may be used without the prior extraction of its gasoline content for the manufacture of carbon black if it is used in a plant producing an average recovery of not less than five pounds of carbon black for each 1,000 cubic feet of gas.

§ 87.132. Use of Gas From Certain Wells for Carbon Black Manufacture

(a) Gas from any gas well completed on or before September 5, 1947, within a common reservoir producing both sweet and sour gas, may be used for the manufacture of carbon black without the prior extraction of its natural gasoline content if:

(1) it is used in a plant producing an average recovery of not less than one and one-half pounds of carbon black for each 1,000 cubic feet of gas; and

(2) the royalty rate and market price paid for the gas at the wellhead at least equals the royalty rate and market price paid at the wellhead in the immediate area for gas used for light and fuel purposes.

(b) In arriving at the market price of sour gas, a reduction of not more than one-half cent per 1,000 cubic feet shall be allowed for purifying the gas to render it suitable for light and fuel purposes.

(c) If the gas is used by a producer, any royalty rate paid shall be paid on the same basis.

§ 87.133. Determining Market Price

(a) After due notice of a hearing, the commission shall hold annual or semiannual hearings, as it considers necessary, for the purpose of determining the market price that is being paid at the wellhead for gas being used and sold for light and fuel purposes.

(b) After the hearing and determination of the market price, the commission shall post and publish the price in its main office in Austin, and its branch office, if any, in the area affected.

(c) All parties contracting for gas under the provisions of this subchapter may accept the posted and published price as the market price to be paid for the gas.

§ 87.134. Effect of Subchapter

The provisions of this subchapter are cumulative of existing laws relating to the uses of gas and do not restrict or affect the manufacture of carbon black from processed sour gas as authorized by Section 86.182 of this code.

[Sections 87.135 to 87.170 reserved for expansion]

SUBCHAPTER F. USE OF GAS DETERMINED BY HYDROCARBON CONTENT

§ 87.171. Gas Containing Low Hydrocarbon Content

Any natural gas, including casinghead gas, produced from any gas well or oil well in this state, containing less than one and one-half gallons of propane and heavier hydrocarbons per 1,000 cubic feet, as determined by fractional analysis made of the gas, may be used for the manufacture of carbon black in a plant producing an average recovery of at least one and one-half pounds of carbon black for each 1,000 cubic feet of gas consumed.

§ 87.172. Gas Containing High Hydrocarbon Content

(a) Except as provided in Subsection (b) of this section, no natural gas, including casinghead gas, produced from any gas well or oil well in this state, containing one and one-half gallons or more of propane and heavier hydrocarbons per 1,000 cubic feet, as determined by fractional analysis made of the gas, may be used for the manufacture of carbon black in a plant producing an average recovery of at least one and one-half pounds of carbon black for each 1,000 cubic feet of gas consumed without the prior extraction of its natural gasoline content.

(b) On the filing of an application and after proper notice and hearing as provided by law, the commission may authorize the use of any natural gas, including casinghead gas, containing one and one-half gallons or more of propane and heavier hydrocarbons per 1,000 cubic feet, as determined by fractional analysis made of the gas, in the manufacture of carbon black in a plant producing an average recovery of at least one and one-half pounds of carbon black for each 1,000 cubic feet of gas consumed if the commission finds it is unprofitable to first extract the natural gasoline content of the gas.

§ 87.173. Additional Extraction to Alleviate Shortage

If a general shortage of propane or heavier liquid hydrocarbons occurs, the commission, after notice and hearing, may require additional extraction of...
hydrocarbons from the gas to alleviate the shortage, but additional extraction shall not be required if it is not economically feasible to do so.

§ 87.174. Applicability of This Subchapter
The provisions of this subchapter shall not apply to:

(1) gas produced from a common reservoir that contains both sweet and sour gas which was being lawfully used for the manufacture of carbon black under the provisions of the source law codified in Subchapters D and E of this chapter at the time of the passage of the source law for this section; or

(2) gas from gas wells located in these reservoirs which were entitled to be so used under the provisions of the source law codified in Subchapters D and E of this chapter at the time of the passage of the source law for this section.

§ 87.211. Prohibited Location
Unless adequate precaution is taken to minimize the emission of smoke from the plant, no channel-type carbon black plant shall be erected or constructed closer than five miles to:

(1) the limits of a city, town, or village incorporated at or before the time the erection or construction of the plant is begun; or

(2) a commercially operated citrus fruit orchard planted not less than one year before the time the erection or construction of the plant is commenced.

§ 87.242. Injunctive Relief
(a) A violation or threatened violation of this chapter may be enjoined by any court of competent jurisdiction in which suit for penalty may be brought.

(b) The court shall issue the writs or prohibitory or mandatory injunctions that the facts justify.

(b) A ranger or an agent of the commission may serve the process anywhere in the State of Texas although it may be directed to “any sheriff or constable” of a particular county. He shall make the same return as any other officer, sign his name, and add under his name the title of “State Ranger” or “Agent, Railroad Commission of Texas,” as the case may be, which is sufficient to make it valid if the writ otherwise is properly prepared.

SUBCHAPTER A.  GENERAL PROVISIONS

§ 89.001.  Policy

The conservation and development of all the natural resources of this state are declared to be a public right and duty. It is also declared that the protection of water and land of the state against pollution or the escape of oil or gas is in the public interest. In the exercise of the police power of the state, it is necessary and desirable to provide additional means so that wells that are drilled for the exploration, development, or production of oil or gas, or as injection or salt water disposal wells, and that have been abandoned and are leaking salt water, oil, gas, or other deleterious substances into freshwater formations or on the surface of the land, may be plugged, replugged, or repaired by or under the authority and direction of the commission.

§ 89.002.  Definitions

(a) In this chapter:

(1) “Well” means a hole drilled for the purpose of:
(A) producing oil or gas;
(B) injecting fluid or gas in the ground in connection with the exploration or production of oil or gas; or
(C) obtaining geological information by taking cores or through seismic operations.

(2) "Operator" means a person who is responsible for the physical operation and control of a well at the time the well is about to be abandoned or ceases operation.

(3) "Nonoperator" means a person who owns a working interest in a well at the time the well is about to be abandoned or ceases operation and is not an operator as defined in Subdivision (2) of this subsection.

(4) "Landowner" means the owner of the land on which the well is located at the time the well is abandoned and one who holds a mineral interest therein.

(5) "Commission" means the Railroad Commission of Texas.

(b) The terms operator and nonoperator as defined in this section do not mean a royalty interest owner or an overriding royalty interest owner.

§ 89.003. Applicability

The provisions of this chapter do not alter causes of action arising before August 1, 1977.

SUBCHAPTER B. DUTY TO PLUG WELLS

§ 89.011. Duty of Operator

The operator of a well shall properly plug the well when required and in accordance with the commission's rules that are in effect at the time of plugging.

§ 89.012. Duty of Nonoperator

If the operator of a well fails to comply with Section 89.011 of this code, each nonoperator is responsible for his proportionate share of the cost of the proper plugging of the well within a reasonable time, according to the rules of the commission in effect at the time the responsibility attaches.

§ 89.013. Duty of Landowner

If the operator and the nonoperator fail to comply with Sections 89.011 and 89.012 of this code, respectively, each landowner is responsible for his proportionate share of the cost of proper plugging of the well within a reasonable time, according to the rules of the commission in effect at the time the responsibility attaches.

SUBCHAPTER C. POWERS AND DUTIES OF THE COMMISSION

§ 89.041. Determining Proper Plugging

If it comes to the attention of the commission that a well that has been abandoned or is not being operated is causing or is likely to cause pollution of fresh water above or below the ground or if gas or oil is escaping from the well, the commission shall determine at a hearing, after due notice, whether or not the well was properly plugged as provided in Section 89.011, Section 89.012, or Section 89.013 of this code.

§ 89.042. Commission Order to Plug

(a) If the commission finds that the well was not properly plugged, it shall order the operator to plug the well according to the rules of the commission in effect at the time the order is issued.

(b) If the operator cannot be found or is no longer in existence or has no assets with which to properly plug the well, the commission shall order the nonoperators to plug the well according to the rules of the commission in effect at the time the order is issued.

(c) If the nonoperators cannot be found or are no longer in existence or have no assets with which to properly plug the well, the commission shall order the landowners to properly plug the well according to the rules of the commission in effect at the time the order is issued.

§ 89.043. Plugging by Commission

If the commission determines at a hearing under Section 89.041 of this code that a well has not been properly plugged or needs replugging, the commission, through its employees or through a person acting as agent for the commission, may plug or replug the well if:

(1) the well was properly plugged according to rules in effect at the time the well was abandoned or ceased to be operated; or

(2) neither the operator, nonoperator, nor the landowner properly plugged the well, and

(A) neither the operator, nonoperator, nor the landowner can be found; or

(B) neither the operator, nonoperator, nor the landowner has assets with which to properly plug the well.

§ 89.044. Right to Enter on Land

The commission or its employees or agents, the operator, the nonoperator, or the landowner may enter the land of another for the purpose of plugging or replugging a well that the commission has determined, under the provisions of Section 89.041 of this code, has not been properly plugged.

§ 89.045. Liability for Damages

The commission and its employees and agents, the operator, the nonoperator, and the landowner are not liable for any damages that may occur as a result of acts done or omitted to be done by them or each of them in a good-faith effort to carry out the provisions of this chapter.

[Sections 89.046 to 89.080 reserved for expansion]

SUBCHAPTER D. COSTS OF PLUGGING WELLS

§ 89.081. Cause of Action for Disproportionate Share of Cost

If an operator, nonoperator, or landowner owns only a partial interest in the well, oil and gas, or land and the operator, nonoperator, or landowner pays a larger proportion of the cost of plugging the well than his proportionate interest in the well, oil and gas, or land, he has a cause of action against the other operators, nonoperators, or landowners for their proportionate shares of the cost of plugging.

§ 89.082. Cause of Action If Landowner Plugs

(a) If a landowner plugs or replugs a well under Section 89.013 of this code, the landowner has a cause of action against the operator and nonoperator or either of them in any court of competent jurisdiction for all reasonable costs and expenses incurred in the plugging or replugging of the well, to be secured by a lien on the interest of the operator and the nonoperator or either of them in:

(1) the oil and gas underlying the lease on which the well is located; and

(2) the fixtures, machinery, and equipment found or used on the lease.

(b) Notwithstanding the provisions of Subsection (a) of this section, if the landowner is responsible for the well not being plugged properly, the landowner does not have a cause of action under this chapter.

§ 89.083. Cause of Action If Commission Plugs

If the commission plugs a well under the provisions of Sections 89.043 through 89.044 of this code, the state has a cause of action for all reasonable expenses incurred in plugging or replugging the well according to the rules of the commission in effect at the time the well is plugged or replugged. The cause of action is:

(1) first, against the operator, to be secured by a lien on his interest in the oil and gas in the land and his fixtures, machinery, and equipment found or used on the land where the well is located;

(2) second, against the nonoperator at the time the well should have been plugged, to be secured by a lien on his interest in the oil and gas in the land; and

(3) third, against the landowner, to be secured by a lien on his interest in the land.

§ 89.084. Money Paid Commission by Private Person

(a) The commission may accept money from private persons and use the money to plug or replug a well.

(b) Paying money to the commission is not an admission that the person paying the money is obligated to plug or replug the well. Evidence that a person has paid money to the commission is not admissible against the person in a suit in which the person's obligation to plug a well is an issue and introducing the evidence is a compulsory ground for mistrial.

[Sections 89.085 to 89.120 reserved for expansion]

SUBCHAPTER E. ENFORCEMENT; JUDICIAL REVIEW

§ 89.121. Enforcement by Commission

In addition to the powers specifically granted to the commission under the provisions of this chapter, the commission may enforce the provisions of this chapter or any rule or order of the commission adopted under the provisions of this chapter in the same manner and on the same conditions as provided in the other chapters of Title 3 of this code.

§ 89.122. Appeal to Courts

Any person affected by the provisions of this chapter may sue to test the validity of any order adopted by the commission under this chapter in the same manner, on the same conditions, and to the same court or courts as prescribed for suits testing the validity of orders of the commission adopted under the general oil conservation statutes of this state.

CHAPTER 90. INTERSTATE COMPACT TO CONSERVE OIL AND GAS

§ 90.001. Ratification
The Interstate Compact to Conserve Oil and Gas, executed in the City of Dallas, on February 16, 1935, by the Governor of Texas, the text of which is set out in Section 90.007 of this code, was ratified by the legislature of this state in Chapter 81, General Laws, Acts of the 44th Legislature, Regular Session, 1935. § 90.002. Original Copy
The original copy of the compact is on deposit with the Department of State of the United States. [Acts 1977, 65th Leg., p. 2556, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

Application of Sunset Act
Acts 1977, 65th Leg., p. 1840, § 2.062, purports to add § 5a to Civil Statutes, art. 6008–1, without reference to repeal of said article by Acts 1977, 65th Leg., p. 2689, ch. 871, art. I, § 2(a)(2). As so added, § 5a reads:

"The office of Interstate Oil Compact Commissioner for Texas is subject to the Texas Sunset Act (Civil Statutes, art. 5429k); and unless continued in existence as provided by that Act the office is abolished, and this Act expires effective September 1, 1983."

Section 3.11(c) of the Code Construction Act (Civil Statutes, art. 5429b–2) provides, in part, that the repeal of a statute by a code does not affect an amendment of the statute by the same legislature which enacted the code and that the amendment is preserved and given effect as part of the code provision.

§ 90.004. Extension
(a) The continuous extension of the Interstate Compact to Conserve Oil and Gas until September 1, 1951, by an agreement executed by the governor in the name of the State of Texas with other states currently members of the Interstate Oil Compact Commission was authorized by the legislature, subject to the approval of Congress, in:

"It is hereby agreed that the Interstate Compact to Conserve Oil and Gas executed in the City of Dallas, Texas, on the 16th day of February, 1935, and now on deposit with the Department of State of the United States, be and the same is hereby extended for a period of four (4) years from its date of expiration (September 1, 1947), this agreement to become effective when executed by any three (3) of the States of Texas, Oklahoma, California, Kansas and New Mexico, and consent thereto is given by Congress."

§ 90.006. Withdrawal From Compact
(a) The governor may determine if and when it is in the best interest of the state to withdraw from the compact as provided by its terms on 60 days' notice.

(b) If the governor determines that the state should withdraw from the compact, he has full authority to give necessary notice and take any steps necessary and proper to effect the withdrawal of the State of Texas from the compact. [Acts 1977, 65th Leg., p. 2557, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]
§ 90.007  NATURAL RESOURCES CODE 990

§ 90.007. Text of Compact

The Interstate Compact to Conserve Oil and Gas reads as follows:

AN INTERSTATE COMPACT TO CONSERVE OIL AND GAS

ARTICLE I

This agreement may become effective within any compacting state at any time as prescribed by that state, and shall become effective within those states ratifying it whenever any three (3) of the States of Texas, Oklahoma, California, Kansas and New Mexico have ratified, and Congress has given its consent. Any oil-producing state may become a party hereto as hereinafter provided.

ARTICLE II

The purpose of this Compact is to conserve oil and gas by the prevention of physical waste thereof from any cause.

ARTICLE III

Each state bound hereby agrees that within a reasonable time it will enact laws, or if laws have been enacted, then it agrees to continue the same in force, to accomplish within reasonable limits the prevention of:

(a) The operation of any oil well with an inefficient gas-oil ratio;
(b) The drowning with water of any stratum capable of producing oil or gas, or both oil and gas, in paying quantities;
(c) The avoidable escape into the open air or the wasteful burning of gas from a natural gas well;
(d) The creation of unnecessary fire hazards;
(e) The drilling, equipping, locating, spacing, or operating of a well or wells so as to bring about physical waste of oil or gas or loss in the ultimate recovery thereof;
(f) The inefficient, excessive, or improper use of the reservoir energy in producing any well.

The enumeration of the foregoing subjects shall not limit the scope of the authority of any state.

ARTICLE IV

Each state bound hereby agrees that it will, within a reasonable time, enact statutes, or if such statutes have been enacted then that it will continue the same in force, providing in effect that oil produced in violation of its valid order and/or gas conservation statutes or any valid rule, order, or regulation promulgated thereunder, shall be denied access to commerce; and providing for stringent penalties for the waste of either oil or gas.

ARTICLE V

It is not the purpose of this Compact to authorize the states joining herein to limit the production of oil or gas for the purpose of stabilizing or fixing the price thereof, or create or perpetuate monopoly, or to promote regimentation, but is limited to the purpose of conserving oil and gas and preventing the unavoidable waste thereof within reasonable limitations.

ARTICLE VI

Each state joining herein shall appoint a representative to a Commission hereby constituted and designated as The Interstate Oil Compact Commission, the duty of which said Commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances, and conditions as may be disclosed for bringing about conservation and the prevention of physical waste of oil and gas; and at such intervals as said Commission deems beneficial it shall report its findings and recommendations to the several states for adoption or rejection.

The Commission shall have power to recommend the coordination of the exercise of the police powers of the several states within their several jurisdictions to promote the maximum ultimate recovery from the petroleum reserves of said states, and to recommend measures for the maximum ultimate recovery of oil and gas. Said Commission shall organize and adopt suitable rules and regulations for the conduct of its business.

No action shall be taken by the Commission, except: (1) by the affirmative votes of the majority of the whole number of the compacting states, represented at any meeting; and (2) by a concurring vote of a majority in interest of the compacting states at said meeting, such interest to be determined as follows: Such vote of each state shall be in the decimal proportion fixed by the ratio of its daily average production during the preceding calendar half-year to the daily average production of the compacting states during said period.

ARTICLE VII

No state by joining herein shall become financially obligated to any other state, nor shall the breach of the terms hereof by any state subject such state to financial responsibility to the other states joining herein.

ARTICLE VIII

This Compact shall expire September 1, 1937. But any state joining herein may, upon sixty (60) days notice, withdraw herefrom.

The representatives of the signatory states have signed this agreement in a single original, which shall be deposited in the archives of the Department of State of the United States, and a duly certified copy shall be forwarded to the Governor of each of the signatory states.

This Compact shall become effective when ratified and approved as provided in Article I. Any oil-producing state may become a party hereto by affixing its signature to a counterpart to be similarly deposited, certified, and ratified.

§ 91.001. Definitions

In this chapter:

(1) "Commission" means the Railroad Commission of Texas.
(2) "Gas" means natural gas.
(3) "Oil" means crude oil and crude petroleum oil.

[Sections 91.002 to 91.010 reserved for expansion]

§ 91.011. Casing

Before drilling into the oil or gas bearing rock, the owner or operator of a well being drilled for oil or gas shall encase the well with good and sufficient wrought iron or steel casing in a manner that will exclude surface or fresh water from the lower part of the well from penetrating the oil or gas bearing rock, and if the well is drilled through the first into the lower oil or gas bearing rock, the well shall be cased in a manner that will exclude fresh water above the last oil or gas bearing rock penetrated.

§ 91.012. Water in Wells

(a) In boring any well for oil or gas, if a person pierces any cap rock or other geological formation in a manner that will cause a flow of salt water or fresh water injurious to an already bored oil well or any oil or gas deposits and that will probably result in the injury of the oil or gas field or already bored oil or gas well, the person shall abandon immediately all work on the well if the flow of water cannot be stopped either by casing off or plugging the well.

(b) No well owner or person boring a well described under Subsection (a) of this section may remove the casing from the drilled well until the flow of water is stopped either by casing off or plugging the well.

(c) The provisions of this section apply only if the cap rock or other formation is pierced at a depth below the horizon at which oil or gas has been discovered already.

§ 91.013. Plugging and Shutting in Wells by Others

(a) If the owner of a well described in Subsection (a) of Section 91.012 of this code neglects or refuses to have the well plugged or shut in for more than 20 days after written notice is given to him, the owner or operator of adjacent or neighboring land may enter the premises on which the well is located and have the well plugged if it is an abandoned well or shut in if it is not abandoned, in the manner provided by law.

(b) Notice may be given to the owner of the well either by personal service on the owner or by posting the notice at a conspicuous place at or near the well.

(c) The reasonable cost and expense incurred in plugging or shutting in the well shall be paid by the owner of the well and may be recovered as debts of like amount are recovered under the law.

§ 91.014. Petition to Restrain Waste

(a) In addition to any other penalties, a district judge, in term time or vacation time, shall hear and determine any petition that is filed to restrain the waste of gas in violation of this subchapter and may issue mandatory or restraining orders that in his judgment are necessary.

(b) The petition may be filed by any citizen of this state and does not have to allege further financial interest of the petitioner in the state’s natural resources than that possessed in common with all citizens of the state.

§ 91.015. Prevention of Waste

Operators, contractors, drillers, pipeline companies, and gas distributing companies that drill for or produce oil or gas or pipe oil or gas for any purpose shall use every possible precaution in accordance with the most approved methods to stop and prevent waste of oil, gas, or both oil and gas in drilling and producing operations, storage, piping, and distribution and shall not wastefully use oil or gas or allow oil or gas to leak or escape from natural reservoirs, wells, tanks, containers, or pipes.

§ 91.016. Confining Gas to Original Stratum

(a) If gas located in a gas-bearing stratum known to contain gas in paying quantities is encountered in a well drilled for oil or gas in this state, the gas shall be confined to its original stratum until it can be produced and used without waste.

(b) Gas-bearing strata shall be adequately protected from infiltrating water.

§ 91.017. Using Gas in the Open Air

(a) Any person who uses gas in lights in the open air or in or around derricks shall turn off the gas not later than 8 a.m. of each day the lights are burning or are used and shall not turn the lights on or relight them between 8 a.m. and 5 p.m.

(b) The person consuming the gas and using the burners in the open air shall enclose them in glass globes or lamps.

§ 91.018. Illumination

No person, copartnership, or corporation may use gas for illuminating purposes in flambeau lights. The use of “jumbo” burners or other burners consuming no more gas than the “jumbo” burners is not prohibited.

§ 91.051. Title

This subchapter may be cited as the Standard Gas Measurement Law.

§ 91.052. Definition

(a) The term “cubic foot of gas” or “standard cubic foot of gas” means the volume of gas contained in one cubic foot of space at a standard pressure base and at a standard temperature base.

(b) The standard pressure base shall be 14.65 pounds per square inch absolute, and the standard temperature base shall be 60 degrees Fahrenheit. If the conditions of pressure and temperature differ from this standard, conversion of the volume from these conditions to the standard conditions shall be made in accordance with the ideal gas laws, corrected for deviation.

§ 91.053. Commission Determination

The commission shall determine the average temperature of gas as produced in each oil and gas field in Texas, other variable factors necessary to calculate the metered volumes in accordance with the ideal gas laws, and the variable factors to correct for deviation from the ideal gas laws in each of the oil and gas fields in the state.

§ 91.054. Notice and Hearing
On request of any interested person, the commission shall give proper notice and hold a public hearing before making a determination under Section 91.053 of this code.

§ 91.055. Findings and Rules
On making the determination, the commission promptly shall make its findings and shall adopt reasonable field rules that may be necessary to effectuate the provisions of this subchapter.

§ 91.056. Use of Findings and Field Rules
(a) Any person may use the findings and field rules of the commission for any purposes under this subchapter.
(b) If the findings or field rules are not used as provided in Subsection (a) of this section in determining volumes under this subchapter, the volumes otherwise determined shall be corrected to the basis of the standard cubic foot of gas as defined in Section 91.052 of this code.

§ 91.057. Method of Reporting
A person required to report volumes of gas under the laws of this state shall report the volumes in number of standard cubic feet calculated and determined under the provisions of this subchapter.

§ 91.058. Sale, Purchase, Delivery, and Receipt of Gas
(a) Each sale, purchase, delivery, and receipt of gas by volume made in this state by, for, or on behalf of an oil and gas lease owner, royalty owner under a lease, or other mineral interest owner shall be made and the gas shall be measured, calculated, purchased, delivered, and accounted for on the basis of a standard cubic foot of gas as defined in this subchapter and determined under this subchapter.
(b) If the provisions of this subchapter operate to change the basis of measurement provided in existing contracts, the price for gas, including royalty gas, provided for in the contracts shall be adjusted to compensate for the change in the method of measuring the volume of gas delivered under the contracts if either the purchaser or seller so desires.
(c) This section is intended to protect parties to contracts in existence on October 4, 1949, so that the total amount of money paid for a volume of gas purchased or required to be accounted for under these contracts shall remain unaffected by this subchapter.

§ 91.059. Constitutionality
If the provisions of Section 91.058 of this code or any part of that section are held to be invalid or unconstitutional by the courts, the remaining portions of this subchapter shall become ineffective and inoperative.

§ 91.060. Penalty
(a) Any person who, as purchaser, shall knowingly fail or refuse to measure, calculate, or account in the manner required in this subchapter for any gas purchased is subject to a penalty of not less than $10 nor more than $500 for each offense.
(b) The penalty is recoverable in the name of the state in a district court in Travis County.
(c) Each day a violation is committed constitutes a separate offense.
(d) It is a defense to a claim for the penalty that the commission has not made the findings under Section 91.055 of this code with regard to the particular field in question.

§ 91.061. Civil Suit
None of these provisions shall prevent an aggrieved person from maintaining a civil suit for damages in the county or counties in which the gas is produced.

None of the provisions of Sections 91.058 through 91.061 of this code affect or apply to purchases or sales made on any basis other than a volume basis.

[Sections 91.063 to 91.100 reserved for expansion]
§ 91.102. Additional Personnel
The commission is directed to employ additional personnel necessary to administer this subchapter and related laws and rules and orders adopted by the commission.

§ 91.103. Persons Required to Execute Bond
Before approval of an application, the commission may require the following persons to execute and file with the commission a bond:

(1) an applicant to drill a new well or redrill or deepen an old well;

(2) an operator who has acquired a producing well and who is requesting authorization to connect a producing well or wells to a pipeline or other outlet; and

(3) an operator filing a well potential form who has reworked and brought into production a previously nonproducing well, resulting in making an application for an allowable for production of oil and gas from the well.

§ 91.104. No Appeal From Commission Decision
The discretion of the commission in requiring a bond under this subchapter is final and may not be appealed.

§ 91.105. Amount of Bond
The bond shall be in the penal sum of $5,000 for each well to be drilled or operated or, in lieu of a separate bond for each well, a blanket bond in the penal sum of $10,000 to cover all wells drilled, to be drilled, and to be operated in the state.

§ 91.106. Bond Conditions
Each bond shall be conditioned that the operator will plug and abandon the well in accordance with the law of the state and the rules and orders of the commission.

§ 91.107. Execution of Bond
Each bond shall be executed by a corporate surety authorized to do business in this state and shall be renewed and be continued in effect until the conditions have been met or release is authorized by the commission.

§ 91.108. New Bond
If a well covered by a bond is transferred, sold, or assigned by its operator, the commission may require the party acquiring the well to execute a new bond, and the bond of the prior operator shall remain in effect until the new bond is provided or filing of the bond is waived.

SUBCHAPTER E. BOOKS, RECORDS, AND REPORTS

§ 91.141. Books and Records
(a) Owners and operators of oil and gas wells shall keep books that show accurately:

(1) the amount of sold and unsold stock;

(2) the amount of promotion money paid;

(3) the amount of oil and gas produced and disposed of and the price for which the oil and gas was sold;

(4) the receipts from the sale or transfer of leases or other property; and

(5) disbursements made in connection with or for the benefit of the business.

(b) The books shall be kept open for the inspection of the commission or any accredited representative of the commission and any stockholder or shareholder or royalty owner in the business.

(c) The owners and operators of oil and gas wells shall report the information to the commission for its information if required by the commission to do so.

§ 91.142. Report to Commission
A person, firm, partnership, joint stock association, corporation, or other domestic or foreign organization operating wholly or partially in this state and acting as principal or agent for another for the purpose of drilling, owning, or operating an oil or gas well or owning or controlling leases of oil and mineral rights, or the transportation of oil or gas by pipeline shall file immediately with the commission:

(1) the name of the company or organization;

(2) the post-office address of the company or organization;

(3) the plan under which the company or organization was organized;

(4) the names and post-office addresses of the trustee or trustees of the company or organization; and

(5) the names and post-office addresses of the officers and directors.
§ 91.143. False Applications, Reports, and Documents

(a) A person is guilty of a felony and on conviction shall be punished by imprisonment in the state penitentiary for not less than two years but not more than five years or by a fine of not more than $1,000 or by both if:

(1) he makes or subscribes any application, report, or other document required or permitted to be filed with the commission by the provisions of Title 102, Revised Civil Statutes of Texas, 1925, as amended, including provisions of this code formerly included in that title, knowing that the application, report, or other document is false or untrue in a material fact;

(2) he aids or assists in, or procures, counsels, or advises the preparation or presentation of any of these applications, reports, or other documents that are fraudulent, false, or incorrect in any material matter, knowing them to be fraudulent, false, or incorrect in any material matter;

(3) he knowingly simulates or falsely or fraudulently executes or signs such an application, report, or other document; or

(4) he knowingly procures these applications, reports, or other documents to be falsely or fraudulently executed, or advises, aids in, or connives at this execution.

(b) If other penalties prescribed in Title 102, Revised Civil Statutes of Texas, 1925, as amended, including provisions of this code formerly included in that title, overlap offenses that are also punishable under this section, the penalties prescribed in this section shall be in addition to other penalties.

(c) No application, report, or other document required or permitted to be filed with the commission under Title 102, Revised Civil Statutes of Texas, 1925, as amended, including provisions of this code formerly included in that title, may be required to be under oath, verification, acknowledgment, or affirmation.

SUBCHAPTER F. UNDERGROUND NATURAL GAS STORAGE AND CONSERVATION

§ 91.171. Short Title

This subchapter may be cited as the Underground Natural Gas Storage and Conservation Act of 1977.

§ 91.172. Declaration of Policy

The underground storage of natural gas promotes the conservation of natural gas, permits the building of reserves for orderly withdrawal in periods of peak demand, makes more readily available natural gas resources to residential, commercial, and industrial customers of this state, provides a better year-round market to the various gas fields, and promotes the public interest and welfare of this state.

§ 91.173. Definitions

In this subchapter:

(1) "Person" means any natural person, partnership or other combination of natural persons, corporation, group of corporations, trust, or governmental entity.

(2) "Gas utility" means a gas utility as defined in Section 3, Public Utility Regulatory Act (Article 1446c, Vernon's Texas Civil Statutes), or Article 6050, Revised Civil Statutes of Texas, 1925, as amended.

(3) "Natural gas" means any gaseous material composed predominantly of the following hydrocarbons or mixtures thereof: methane, ethane, propane, butane (normal or isobutane), in either its original or manufactured state, or gas which has been processed to separate it into one or more of its component parts after its withdrawal from the earth.

(4) "Native gas" means:

(A) natural gas which has not previously been withdrawn from the earth; or

(B) natural gas which has been withdrawn from the storage facility, processed, and re injected into the storage facility.

(5) "Storage facility" means any subsurface sand, stratum, or formation used or to be used for the underground storage of natural gas and all surface and subsurface rights and appurtenances necessary to the operation of a facility for the underground storage of natural gas.

(6) "Storer" means (A) a gas utility, (B) a wholly owned subsidiary of a gas utility, (C) the parent corporation of a gas utility, or (D) a wholly owned subsidiary of a parent corporation which also wholly owns a subsidiary gas utility, but a nonutility storer included in category (B), (C), or (D) must operate the storage facility pursuant to a contract with its affiliated gas utility that provides that all withdrawals of natural gas from the storage facility must be delivered to the affiliated gas utility.

(7) "Substantially depleted" means that at least 75 percent of the estimated volume of recoverable native gas reserves originally in place in any gas-bearing sand, formation, or stratum have been withdrawn from the sand, formation, or stratum.

(8) "Interested person" means any person who enters an appearance at the commission hearing required by Section 91.174 of this code.

(9) "Commission" means the Railroad Commission of Texas.

§ 91.174. Findings of Commission
(a) Any storer desiring to exercise the right of eminent domain for the acquisition of a storage facility shall, as a condition precedent to the filing of its petition in the appropriate court, obtain from the commission an order finding:

(1) that the underground formation or stratum sought to be acquired is classified by the commission as a gas reservoir and is suitable for the underground storage of natural gas and that the storage of natural gas is necessary for the gas utility to provide adequate service to the public and is in the public interest;

(2) that the use of the formation or stratum as a storage facility will cause no injury to surface or underground water resources;

(3) that the formation or stratum does not contain native gas producible in paying quantities unless the recoverable volumes of native gas originally in place are substantially depleted and unless the formation or stratum has a greater value of ultimate use to the consuming public as a storage facility to ensure an adequate supply of natural gas or for the conservation of natural gas than the production of native gas which remains;

(4) the extent of the horizontal limits of the reservoir expected to be penetrated by displaced or injected gas; and

(5) that no portion of the formation or stratum sought to be acquired has been condemned or is being utilized for the injection, storage, and withdrawal of gas by others.

(b) The designation of a storage facility does not prevent any storer from instituting additional proceedings in the event it is later determined that the underground reservoir should be extended to prevent the escape, displacement, or withdrawal by others of injected gas.

§ 91.175. Commission Jurisdiction
The commission shall have jurisdiction to supervise the construction and operation of all storage facilities formed pursuant to this subchapter, and in addition to the findings required by Section 91.174 of this code, the commission shall include in any order of approval a requirement that the storer file a report each month, including each month prior to the time the storage facility is in operation, with the commission showing, for that month, the volume of gas injected and stored gas withdrawn from storage.

§ 91.176. Withdrawal of Native Gas
A storer may withdraw from storage injected and stored gas as market demand dictates. However, any time a storer's withdrawals from a storage facility equal the volume of gas injected for storage, the storer shall not withdraw additional gas from the storage facility without first obtaining specific authority from the commission.

§ 91.177. Storage Operations Must be Bona Fide
(a) A storer must initiate injection operations for gas storage within 12 months after the condemnation order of the court becomes final and storage operations must continue with reasonable diligence after that time.

(b) Should the monthly reports to the commission indicate that bona fide underground gas storage operations are not being conducted, the commission may, on its own motion or on motion of any interested person, schedule a public hearing, giving the storer the opportunity to show cause why the commission approval of the project should not be withdrawn.

(c) If the commission finds that the storage project is not being conducted in a bona fide manner, it shall issue an order withdrawing approval of the storage facility, and all property, both mineral and surface, that was condemned by the storer shall revert to those who owned the property at the time of condemnation or their successors.

§ 91.178. Relocation of Facilities
In the event the acquisition or operation of a storage facility acquired through the exercise of the power of eminent domain requires the relocation or alteration of any railroad, electric, telegraph, telephone, or pipeline lines or facilities, the expense of the relocation or alteration shall be borne by the storer. The expense of relocation means the actual cost incurred in providing a comparable replacement line or facility, less net salvage value from the sale or other disposition of the old facility.

§ 91.179. Appropriation of Storage Facilities; Limitations
After an order of the commission is issued approving a storage facility, a storer may condemn without further attack as to its right to condemn, any subsurface sand, stratum, or formation for the underground storage of natural gas, condemning all mineral and royalty rights as are reasonably necessary for the operation of the storage facility, subject to the limitations of this subchapter, and the storer may condemn any other interests in property that may be required, including interests in the surface estate in the sand, stratum, or formation reasonably necessary to the operation of the storage facility, provided that:

(1) no part of a reservoir is subject to condemnation unless the storer has acquired by option,
lease, conveyance, or other negotiated means at least 66 2/3 percent of the ownership of minerals, including working interests, and 66 2/3 percent of the ownership of the royalty interests, computed in relation to the surface area overlying the part of the reservoir which as found by the commission to be expected to be penetrated by displaced or injected gas;

(2) no dwelling, barn, store, or other building is subject to condemnation; and

(3) the right of condemnation is without prejudice to the rights of the owners or holders of other rights or interests of land to drill through the storage facility under such terms and conditions as the commission may prescribe for the purpose of protecting the storage facility against pollution or escape of natural gas and is without prejudice to the rights of the owners or holders of other rights or interests of the land to all other uses so long as those uses do not interfere with the operation of the storage facility.

§ 91.180. Institution of Condemnation Proceedings

(a) The finding by the commission that underground storage is in the public interest is binding on all persons whose property the storer has the right to condemn. After that finding of the commission, the storer has the right to condemn all of the underground storage area and any surface area required for the use and enjoyment of the storage facility.

(b) The storer shall initiate eminent domain proceedings in the court having jurisdiction in the area in which a portion of the land is situated. The petition shall set forth the purpose for which the property is sought to be acquired, a description of the sand, stratum, or formation and of the land under which it is alleged to be contained, the names of the owners as shown by the deed records of the county, and a description of all other property and rights sought to be appropriated for use in connection with the storage facility, including any parts of the surface necessary for any facilities incidental to the operation of the storage facility.

(c) The petition shall state facts showing that the storer has obtained the findings of the commission required by Section 91.174 of this code, that the storer in good faith has been unable to acquire the rights sought to be appropriated, that the storer has acquired, prior to the filing of the petition, by any means other than condemnation, at least 66 2/3 percent of the ownership of the minerals, including working interests, and 66 2/3 percent of the royalty interests of the property rights in the storage facility required for that purpose, and shall describe the surface area overlying the storage facility the storer seeks to acquire and the names of the owners of those rights and interests.

(d) Where more than one tract of land is involved, all or any tracts may be joined in one proceeding, without prejudice to the right of the storer to institute additional proceedings; provided, that the failure to make service upon a defendant does not affect the right of the storer to proceed against any or all other of the defendants upon whom service has been made.

§ 91.181. Exercise of Right of Eminent Domain

All proceedings in connection with the condemnation and acquisition of storage facilities shall be in accordance with Articles 3264 through 3271, Revised Civil Statutes of Texas, 1925, as amended, and to the extent of any conflict between those articles and this subchapter, the provisions of this subchapter prevail.

§ 91.182. Ownership of Stored Gas

All natural gas in the stratum condemned which is not native gas, and which is subsequently injected into storage facilities is personal property and is the property of the injector or its assigns, and in no event is the gas subject to the right of the owner of the surface of the land or of any mineral or royalty owner's interest under which the storage facilities lie, or of any person other than the injector to produce, take, reduce to possession, either by means of the law of capture or otherwise, waste, or otherwise interfere with or exercise any control over a storage facility. Upon failure, neglect, or refusal of the person to comply with this section, the storer has the right to compel compliance by injunction or by other appropriate relief by application to a court of competent jurisdiction.

§ 91.183. Rights of Purchasers of Native Gas

(a) In the event there are remaining reserves of native gas in the storage facility which are dedicated to a purchaser and the purchaser and storer are unable to agree on an equitable settlement of rights with respect to the remaining native gas within a period of time that will prevent interference with the operation of the storage facility, the storer or purchaser may apply to the commission for an adjudication concerning remaining reserves of native gas.

(b) Upon application, the commission shall direct a settlement of remaining reserves of native gas that is equitable to all parties, but which does not interfere with the public benefits arising from the operation of the storage facility.

(c) In addition to any other disposition that is equitable to all parties, the commission may make a finding of the quantity of remaining recoverable native gas and an allocation of future production on
§ 91.183 NATURAL RESOURCES CODE

a reasonable production schedule and order delivery to the purchaser by the storer of the amounts of native gas that the commission finds would have been taken by the purchaser during the term of the purchase agreement.

§ 91.184. Abandonment

(a) When a storer has permanently abandoned the storage facility, the storer shall file with the commission a notice of abandonment, and shall file an instrument in the deed records in the appropriate county or counties, stating that the storage has ceased, and that all property, both mineral and surface, condemned by the storer has reverted to those who owned the property at the time of condemnation, or their heirs, successors, or assigns.

(b) The storer shall also file in the deed records in the appropriate county or counties a list of the owners of the mineral, royalty, and surface owners to whom the various interests have reverted, together with an affidavit that the storer has compiled the list from a current examination of title records and that the list is true and correct to the best of the knowledge of the affiant.

SUBCHAPTER G. UNDERGROUND HYDROCARBON STORAGE

§ 91.201. Definitions

In this subchapter:

(1) “Underground hydrocarbon storage facility” or “storage facility” means a subsurface sand, stratum, or geological formation used for the underground storage of hydrocarbons, and includes surface or subsurface rights and appurtenances necessary for the operation of the facility.

(2) “Hydrocarbons” means oil, gas, or products of oil or gas, as those terms are defined by Section 85.001 of this code.

(3) “Waste” means surface or subsurface waste, as defined by Section 85.046 of this code, of hydrocarbons, including, but not limited to, the physical or economic waste or loss of hydrocarbons in the creation, operation, maintenance, or abandonment of an underground hydrocarbon storage facility.

(4) “Commission” means the Railroad Commission of Texas.

§ 91.202. Policy

It is the policy of this state and the purpose of this subchapter to prevent the waste of oil, gas, and products of oil or gas, to protect the ground and surface water of the state from unreasonable degradation, and to protect the public health, welfare, and physical property in the creation, operation, maintenance, and abandonment of underground hydrocarbon storage facilities.

§ 91.203. Authority; Rules

(a) The commission shall supervise or monitor the construction, operation, maintenance, and closure of storage facilities.

(b) The commission may adopt reasonable rules or issue reasonable orders to implement the policies of this subchapter and may establish minimum standards regulating the creation, operation, maintenance, and abandonment of underground hydrocarbon storage facilities. The rules and standards of the commission may include, but are not limited to, requirements for monitoring, recordkeeping, and reporting, the drilling and creation of the facility, selecting the site of the facility, and for proper closure of the facility on abandonment.

§ 91.204. Permits

(a) The commission by rule may require a person who creates, operates, maintains, or abandons an underground hydrocarbon storage facility to obtain a permit from the commission. A permit issued by the commission may contain provisions and conditions necessary to implement the policies of this subchapter. The commission may adopt reasonable rules for the amendment, revocation, transfer, or suspension of a permit.

(b) A person desiring to obtain a permit or to amend a permit must submit an application containing the information required by the commission.

§ 91.205. Authority to Enter Property

Members and employees of the commission may enter public or private property at reasonable times to inspect and investigate conditions relating to the creation, operation, maintenance, or abandonment of an underground hydrocarbon storage facility. The members and employees may not enter private property having management in residence without notifying the management of their presence and shall observe safety, internal security, and fire protection rules of the establishment being inspected.

§ 91.206. Authority to Examine Records

Members and employees of the commission may examine and copy during regular business hours records pertaining to the creation, operation, maintenance, or abandonment of an underground hydrocarbon storage facility.

§ 91.207. Notice of Noncompliance

(a) On receipt of notice from the commission that a person creating, operating, maintaining, or abandoning an underground hydrocarbon storage facility has violated this subchapter or a term, condition, or provision of a permit issued under this subchapter, an operator of the pipeline or other carrier connected to the facility shall disconnect from the facility and shall remain disconnected from the facility until notice of compliance has been received from the commission.

(b) On receipt of notice from the commission of a violation of this subchapter, a rule of the commission issued under this subchapter, or a term, condition, or provision of a permit issued under this subchapter, the owner or operator of an underground hydrocarbon storage facility shall discontinue any removal of hydrocarbons from the facility or any addition of hydrocarbons to the facility and may not begin or renew removal of hydrocarbons from the facility or begin or renew addition of hydrocarbons to the facility until notice of compliance has been received from the commission.

Section 6 of the 1981 Act provides:
"Sections 91.207 and 91.208, Natural Resources Code, apply only to violations of Subchapter G of Chapter 91 of this code and of rules and permits that occur on or after the effective date of this Act. Authorizations for hydrocarbon storage facilities issued before the effective date of this Act continue in effect under their terms until amended, revoked, or suspended by the commission and the storage facilities continue to be governed by those authorizations."

§ 91.208. Civil Penalty

(a) A person who violates this subchapter, a rule or order of the commission made under this subchapter, or a term, condition, or provision of a permit issued under this subchapter is subject to a civil penalty not to exceed $1,000 for each offense. Each day a violation is committed is a separate offense.

(b) The action may be brought by the commission in any court of competent jurisdiction in the county where the offending activity is occurring, where the defendant resides, or in Travis County.

Section 6 of the 1981 Act provides:
"Sections 91.207 and 91.208, Natural Resources Code, apply only to violations of Subchapter G of Chapter 91 of that code and of rules and permits that occur on or after the effective date of this Act. Authorizations for hydrocarbon storage facilities issued before the effective date of this Act continue in effect under their terms until amended, revoked, or suspended by the commission and the storage facilities continue to be governed by those authorizations."

§ 91.209. Injunction

The commission by injunction or other appropriate remedy may enforce a valid rule or order made under this subchapter or a term or condition of a permit issued by the commission under this subchapter. The suit shall be brought in a court of competent jurisdiction in the county where the offending activity is occurring, where the defendant resides, or in Travis County.

§ 91.210. Procedure

(a) At the request of the commission, the attorney general shall institute and conduct a suit in the name of the state for injunctive relief or to recover a civil penalty as provided by Section 91.208 or 91.209 of this subchapter.

(b) A party to a suit may appeal from a final judgment as in other civil cases.

SUBTITLE C. POOLING AND COOPERATIVE AGREEMENTS

CHAPTER 101. COOPERATIVE DEVELOPMENT

SUBCHAPTER A. GENERAL PROVISIONS

§ 101.001. Definition

In this chapter, "commission" means the Railroad Commission of Texas.

[Acts 1977, 65th Leg., p. 2556, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 101.002. Existing Agreement Rights

None of the provisions in this chapter restrict any of the rights that a person now may have to make and enter into unitization and pooling agreements.

[Acts 1977, 65th Leg., p. 2556, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 101.003. Applicability

None of the provisions in this chapter impair the power of the commission to prevent waste under the oil and gas conservation laws of the state except as provided in Section 101.004 of this code or repeal, modify, or impair any of the provisions of Sections 85.002 through 85.003, 85.041 through 85.055, 85.056 through 85.064, 85.125, 85.201 through 85.207, 85.241 through 85.255.
§ 101.004. Conflict With Antitrust Acts
(a) Agreements and operations under agreements which are in accordance with the provisions in this chapter, being necessary to prevent waste and conserve the natural resources of this state, shall not be construed to be in violation of the provisions of Chapter 15, Business & Commerce Code, as amended.

(b) If a court finds a conflict between the provisions in this chapter and Chapter 15, Business & Commerce Code, as amended, the provisions in this chapter are intended as a reasonable exception to that law, necessary for the public interests stated in Subsection (a) of this section.

(c) If a court finds that a conflict exists between the provisions in this chapter and Chapter 15, Business & Commerce Code, as amended, and finds that the provisions in this chapter are not a reasonable exception to said Chapter 15, it is the intent of the legislature that the provisions in this chapter, or any conflicting portion of them, shall be declared invalid rather than declaring Chapter 15, Business & Commerce Code, as amended, or any portion of it, invalid.

[Sections 101.005 to 101.100 reserved for expansion]

SUBCHAPTER B. COOPERATIVE AGREEMENTS IN SECONDARY RECOVERY OPERATIONS

§ 101.011. Authorized Agreements for Separately Owned Properties
Subject to the approval of the commission, as provided in this chapter, persons owning or controlling production, leases, royalties, or other interests in separate property in the same oil field, gas field, or oil and gas field may voluntarily enter into and perform agreements for either or both of the following purposes:

(1) to establish pooled units, necessary to effect secondary recovery operations for oil or gas, including those known as cycling, recycling, represuring, water flooding, and pressure maintenance and to establish and operate cooperative facilities necessary for the secondary recovery operations;

(2) to establish pooled units and cooperative facilities necessary for the conservation and use of gas, including those for extracting and separating the hydrocarbons from the natural gas or casinghead gas and returning the dry gas to a formation underlying any land or leases committed to the agreement.

§ 101.012. Persons Bound by Agreements
Agreements for pooled units and cooperative facilities do not bind a landowner, royalty owner, lessor, lessee, overriding royalty owner, or any other person who does not execute them. The agreements bind only the persons who execute them, their heirs, successors, assigns, and legal representatives. No person shall be compelled or required to enter into such an agreement.

§ 101.013. Commission Approval
(a) Agreements for pooled units and cooperative facilities are not legal or effective until the commission finds, after application, notice, and hearing:

(1) that the agreement is necessary to accomplish the purposes specified in Section 101.011 of this code;

(2) that it is in the interest of the public welfare as being reasonably necessary to prevent waste and to promote the conservation of oil or gas or both;

(3) that the rights of the owners of all the interests in the field, whether signers of the unit agreement or not, would be protected under its operation;

(4) that the estimated additional cost, if any, of conducting the operation will not exceed the value of additional oil and gas so recovered, by or on behalf of the several persons affected, including royalty owners, owners of overriding royalties, oil and gas payments, curried interests, lien claimants, and others as well as the lessees;

(5) that other available or existing methods or facilities for secondary recovery operations or for the conservation and utilization of gas in the particular area or field concerned or for both are adequate for the purposes; and

(6) that the area covered by the unit agreement contains only that part of the field that has reasonably been defined by development, and that the owners of interests in the oil and gas under each tract of land in the area reasonably defined by development are given an opportunity to enter into the unit on the same yardstick basis as the owners of interests in the oil and gas under the other tracts in the unit.

(b) A finding by the commission that the area described in the unit agreement is insufficient or covers more acreage than is necessary to accomplish the purposes of this chapter is grounds for the disapproval of the agreement.

§ 101.014. Jointly Owned Properties
None of the provisions of this chapter shall be construed to require the approval of the commission of voluntary agreements for the joint development and operation of jointly owned property.

§ 101.015. Commission Regulation

An agreement executed under the provisions of this chapter is subject to any valid order or rule of the commission relating to location, spacing, proration, conservation, or other matters within the authority of the commission, whether adopted prior to or subsequent to the execution of the agreement.

(a) An agreement authorized by this chapter may provide for the location and spacing of input wells and for the extension of leases covering any part of land committed to the unit as long as operations for drilling or reworking are conducted on the unit or as long as production of oil or gas in paying quantities is had from any part of the land or leases committed to the unit. However, no agreement may relieve an operator from the obligation to develop reasonably the land and leases as a whole committed to the unit.

(b) An agreement authorized by this chapter may provide that the dry gas after extraction of hydrocarbons may be returned to a formation underlying any land or leases committed to the agreement and may provide that no royalties are required to be paid on the gas so returned.

§ 101.017. Prohibited Provisions

(a) No agreement authorized by this chapter may attempt to contain the field rules for the area or field, or provide for or limit the amount of production of oil or gas from the unit properties, those provisions being solely the province of the commission.

(b) No agreement authorized by this chapter may provide directly or indirectly for the cooperative refining of crude petroleum, distillate, condensate, or gas, or any by-product of crude petroleum, distillate, condensate, or gas. The extraction of liquid hydrocarbons from gas, and the separation of the liquid hydrocarbons into propanes, butanes, ethanes, distillate, condensate, and natural gasoline, without any additional processing of any of them, is not considered to be refining.

(c) No agreement authorized by this chapter may provide for the cooperative marketing of crude petroleum, condensate, distillate, or gas, or any by-products of them.

§ 101.018. Effect of Approval Outside of Unit

The approval of an agreement authorized by this chapter shall not of itself be construed as a finding that operations of a different kind or character in the portion of the field outside of the unit are wasteful or not in the interest of conservation.

[Sections 102.005 to 102.010 reserved for expansion]

SUBCHAPTER B. REQUIREMENTS AND PROCEDURE FOR POOLING

§ 102.011. Authority of Commission
When two or more separately owned tracts of land are embraced in a common reservoir of oil or gas for which the commission has established the size and shape of proration units, whether by temporary or permanent field rules, and where there are separately owned interests in oil and gas within an existing or proposed proration unit in the common reservoir and the owners have not agreed to pool their interests, and where at least one of the owners of the right to drill has drilled or has proposed to drill a well on the existing or proposed proration unit to the common reservoir, the commission, on the application of an owner specified in Section 102.012 of this code and for the purpose of avoiding the drilling of unnecessary wells, protecting correlative rights, or preventing waste, shall establish a unit and pool all interests in the unit within an area containing the approximate acreage of the proration unit, which unit shall in no event exceed 160 acres for an oil well or 640 acres for a gas well plus 10 percent tolerance.

§ 102.012. Owners Authorized to Apply for Pooling
The following interested owners may apply to the commission for the pooling of mineral interests:
(1) the owner of any interest in oil and gas in an existing proration unit or with respect to a proposed unit;
(2) the owner of any working interest; or
(3) any owner of an unleased tract other than a royalty owner.

§ 102.013. Required Voluntary Pooling Offer
(a) The applicant shall set forth in detail the nature of voluntary pooling offers made to the owners of the other interests in the proposed unit.
(b) The commission shall dismiss the application if it finds that a fair and reasonable offer to pool voluntarily has not been made by the applicant.
(c) An offer by an owner of a royalty or any other interest in oil or gas within an existing proration unit to share on the same yardstick basis as the
other owners within the existing proration unit are then sharing shall be considered a fair and reasonable offer. [Acts 1977, 65th Leg., p. 2572, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.014. Productive Acreage Equal to Standard Proration Unit
(a) The commission shall not require the owner of a mineral interest, the productive acreage of which is equal to or in excess of the standard proration unit for the reservoir, to pool his interest with others unless requested by the holder of an adjoining mineral interest, the productive acreage of which is smaller than such pattern, who has not been provided a reasonable opportunity to pool voluntarily.
(b) If the conditions specified in Subsection (a) of this section exist, the commission shall pool the smaller tract with adjacent acreage on a fair and reasonable basis and may authorize a larger allowable for the unit if it exceeds the size of the standard proration unit for the reservoir. [Acts 1977, 65th Leg., p. 2572, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.015. Prohibited Provisions in Operating Agreement
A pooling agreement, offer to pool, or pooling order is not considered fair and reasonable if it provides for an operating agreement containing any of the following provisions:
(1) preferential right of the operator to purchase mineral interests in the unit;
(2) a call on or option to purchase production from the unit;
(3) operating charges that include any part of district or central office expense other than reasonable overhead charges; or
(4) prohibition against nonoperators questioning the operation of the unit. [Acts 1977, 65th Leg., p. 2572, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.016. Notice of Hearing
On the filing of an application for pooling of interests into a unit under the provisions of this chapter, at least 30 days notice before hearing on the application shall be given to all interested parties, including notice by publication if there are unknown owners or owners whose whereabouts are unknown. The notice shall be given in the manner and form prescribed by the commission. [Acts 1977, 65th Leg., p. 2572, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.017. Pooling Order
(a) After notice and hearing, all orders effecting the pooling shall be made on terms and conditions that are fair and reasonable and will afford the owner or owners of each tract or interest in the unit the opportunity to produce or receive his fair share.
(b) Each order shall:
(1) describe the land included in the unit, identifying the reservoir to which it applies;
(2) designate the location of the well; and
(3) appoint an operator for the unit. [Acts 1977, 65th Leg., p. 2572, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.018. Acreage Subject to Pooling
The commission shall pool only the acreage which at the time of its order reasonably appears to lie within the productive limits of the reservoir. [Acts 1977, 65th Leg., p. 2573, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

[Sections 102.019 to 102.050 reserved for expansion]

SUBCHAPTER C. RIGHTS IN A POOLED UNIT
§ 102.051. Ownership of Production
(a) For the purpose of determining the portions of production owned by the persons owning interests in the pooled unit, the production shall be allocated to the respective tracts within the unit in the proportion that the number of surface acres included within each tract bears to the number of surface acres included in the entire unit.
(b) Notwithstanding the provisions in Subsection (a) of this section, if the commission finds that allocation on a surface-acreage basis does not allocate to each tract its fair share, the commission shall allocate the production so that each tract will receive its fair share, which for any nonconsenting owner shall be no less than he would receive under a surface-acreage allocation. [Acts 1977, 65th Leg., p. 2573, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.052. Drilling and Completion Costs
(a) As to an owner who elects not to pay his proportionate share of the drilling and completion costs in advance, the commission shall make provision in the pooling order for reimbursement solely out of production, to the parties advancing the costs, of all actual and reasonable drilling, completion, and operating costs plus a charge for risk not to exceed 100 percent of the drilling and completion costs.
(b) If there is a dispute relative to the costs, the commission shall determine the proper costs and their allocation among working interest owners after due notice to interested parties and a hearing on the costs. [Acts 1977, 65th Leg., p. 2573, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.053. Effect of Operations
(a) The operations on and production from any portion of a unit for which a pooling order has been entered shall be considered for all purposes the conduct of the operations on and production from each separately owned tract in the pooled unit. If a gas well on a pooled unit is shut-in, it shall be considered that the shut-in gas well is on each separately owned tract in the pooled unit.
§ 102.053 NATURAL RESOURCES CODE

(b) If only part of a tract is included in the unit, operations on, production from, or a shut-in gas well on the unit shall maintain an oil and gas lease on the tract as to the part excluded from the unit only if the lease would be maintained had the unit been created voluntarily under the provisions of the lease. [Acts 1977, 65th Leg., p. 2573, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

[Sections 102.054 to 102.080 reserved for expansion]

SUBCHAPTER D. DISSOLUTION OF UNIT

§ 102.081. Dissolved With Consent of Owners
A unit established by order of the commission under this chapter may not be modified or dissolved subsequently without the consent of all mineral owners affected, except as necessary to permit its enlargement as provided in Subchapter B of this chapter. [Acts 1977, 65th Leg., p. 2573, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.082. Automatic Dissolution
A unit is automatically dissolved:

(1) one year after its effective date if no production or drilling operations have been had on the unit;
(2) six months after the completion of a dry hole on the unit; or
(3) six months after cessation of production from the unit. [Acts 1977, 65th Leg., p. 2574, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.083. Termination of Pooled Lease
On termination of a lease pooled by order of the commission under authority granted by this chapter, interests covered by the lease are considered pooled as unleased mineral interests. [Acts 1977, 65th Leg., p. 2574, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

[Sections 102.084 to 102.110 reserved for expansion]

SUBCHAPTER E. JUDICIAL REVIEW

§ 102.111. Right to Appeal
A person affected by an order of the commission adopted under the authority of this chapter is entitled to judicial review of that order in a manner other than by trial de novo. [Acts 1977, 65th Leg., p. 2574, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 102.112. Venue
Appeal shall be to the district court of the county in which the land or any part of the land covered by the order is located and not elsewhere, notwithstanding the provisions of Sections 85.241 through 85.243 of this code. [Acts 1977, 65th Leg., p. 2574, ch. 871, art. I, § 1, eff. Sept. 1, 1977.]

§ 111.002. **Common Carriers Under Chapter**

A person is a common carrier subject to the provisions of this chapter if it:

(1) owns, operates, or manages a pipeline or any part of a pipeline in the State of Texas for the transportation of crude petroleum to or for the public for hire, or engages in the business of transporting crude petroleum by pipeline;

A person that is a common carrier under Subsection (5), Section 111.002 of this code must apply for and be issued a certificate of public convenience and necessity from the commission pursuant to the commission's authority to issue certificates under Section 111.302 of this code if the commission finds after a hearing that the public convenience and necessity will be served by the construction and operation of the pipeline.

(b) In exercising its powers and duties under this section, the commission may not issue a permit for or attempt to regulate in any manner the condemnation, appropriation, or acquisition of surface or ground water in Texas.

(c) The commission shall not issue a permit, certificate, or any authority to any applicant whose rates and charges are not regulated by government authority, either state or federal, and that state or federal regulations insure to the public and to the ultimate electric consumer that the contracts, rates, and charges shall be just and reasonable, nondiscriminatory, and offering no preference or advantage to any person, corporation, entity, or group.

The notice shall, among other things, specify to the extent practicable the land which would be subject to the power of eminent domain.

(b) The commission shall then conduct public hearings in areas of the state along the prospective pipeline right-of-way as it shall determine shall be necessary to give property owners an opportunity to be heard. The commission is vested with authority to alter the right-of-way to meet with local objections.

§ 111.304. Transportation Contract

No common carrier pipeline transporting coal in whatever form shall contract or otherwise agree to transport coal for a term in excess of three years without prior approval of that contract or agreement by the commission which approval shall be given on determination that the contract or agreement is in the public interest in which case the contract or agreement shall be enforceable.

§ 111.305. Other Agencies

(a) The commission shall seek and act on the recommendations of the Texas Air Control Board, the Texas Water Quality Board, the Governor's Energy Advisory Council, or their successors responsible for environmental determinations and shall specify the proper use and disposal of nondischARGEable water.

(b) Neither the authority conveyed to the commission by this subchapter to issue certificates and to promulgate rules governing pipelines transporting coal in whatever form nor the powers and duties conveyed on those pipelines by this chapter shall affect, diminish, or otherwise limit the jurisdiction and authority of the Texas Water Commission and the Texas Water Quality Board, or their successors, to regulate by applicable rules the acquisition, use, control, disposition, and discharge of water or water rights in Texas.

(b) The inspection shall be performed before licensing, but in no event later than 15 days after the inspection is requested in writing by the applicant for license.

(c) A category "E" license and any other license specified by commission rule shall not be issued until the inspection under Subsection (a) of this section verifies the applicant to be in satisfactory compliance with all current safety laws, rules, and practices.

[Section 113.090 reserved for expansion]

§ 113.091. License Denial

(a) Should an applicant fail to meet the requirements for original or renewal licensing set out in this chapter, the commission shall have written notification prepared promptly and mailed to the applicant. The notice shall specify the reason for the applicant's failure to qualify for license and advise the applicant of the right to request a hearing.

(b) Within 30 days of the notice of denial, an applicant for license under this chapter who is denied a license may request a hearing to determine whether or not the applicant has complied in all respects with the licensing procedure applicable to the category or categories of license sought. The applicant's request for hearing must be in writing and delivered to the director of the LPG division.

(c) A hearing to determine an applicant's compliance with the licensing procedure applicable to the category or categories of license sought must be scheduled within 30 days following receipt of a request under Subsection (b) of this section.

(d) If the record made at the hearing supports the applicant's claim, the commission shall enter an order in its records to that effect, noting the category or categories for which the applicant is found entitled to be licensed, and the commission shall have the license or licenses issued. If the applicant is found unqualified, the commission shall likewise enter an order in its records to that effect, and no license may be issued to the applicant.

§ 113.092. License Issuance

(b) The license shall be issued in the name under which the applicant proposes to conduct business.

(c) The license shall belong to the applicant to which it is issued and shall be nontransferable.

§ 113.093. License Renewal

(a) A license issued pursuant to this chapter is renewable on the timely payment or tender of the renewal license fee by 12 midnight, August 31, of each year.

(b) A renewal license will be issued to a licensee as soon as is practicable after compliance with Subsection (a) of this section, and fulfillment of insurance, examination, and seminar requirements established by this chapter, and submission of any information and data the commission may reasonably require.

(c) Renewal license fees shall be nonrefundable.

Section 2 of the 1979 amendatory act provided:
"All current LPG licenses and registrations duly issued by the commission before September 1, 1980, shall be deemed valid in all respects and may be renewed on September 1, 1980, as provided in this Act without penalty or other abridgement of rights or privileges."

(c) Except as provided in Section 113.099 of this code, the types and amounts of insurance provided in Subsections (d) through (g) of this section are required while engaged in any of the activities set forth in Section 113.082 of this code or any activity incidental thereto.

(d) A category "C," "E," "H," or "J" licensee must carry automobile bodily injury and property damage liability coverage on each motor vehicle, including trailers and semitrailers, used to transport LP-gas. The commission shall establish by rule a reasonable amount of coverage to be maintained, except that coverage shall not be less than the amounts required as proof of financial responsibility under the Texas Motor Vehicle Safety-Responsibility Act, as amended (Article 6701h, Vernon's Texas Civil Statutes). (e) All licensees must carry general liability coverage in a reasonable amount, based on the type or types of licensed activities, which shall be established by commission rule.

(f) All licensees must carry workers' compensation, including employer's liability coverage.

(g) A category "A," "C," or "E" licensee must carry completed operations and products liability insurance in a reasonable amount, based on the type or types of licensed activities, which shall be established by commission rule.

§ 113.098. Insurance Conditions

(a) As evidence that required insurance has been secured and is in force, certificates of insurance shall be filed with the division before licensing and license renewal.

(b) All certificates filed under this section shall be continuous in duration.

(c) Cancellation of a certificate of insurance becomes effective on the occurrence of any of the following events and not before:

(1) division receipt of written notice stating the insurer's intent to cancel a policy of insurance and the passage of time equivalent to the notice period required by law to be given the insured before the insurance cancellation;

(2) receipt by the division of an acceptable replacement insurance certificate;

(3) voluntary surrender of a license and the rights and privileges conferred by the license;

(4) division receipt of a statement made by a licensee stating that the licensee is not actively engaging in any operations which require a particular type of insurance and will not engage in those operations unless and until all certificates of required insurance applicable to those operations are filed with the division.

(d) Cancellation under Subsection (c) of this section shall not become effective until approved by the commission.

§ 113.099. Statements in Lieu of Insurance Certificates

(a) A category "C," "E," "H," or "J" licensee or applicant for license that does not operate or contemplate the operation of a motor vehicle equipped with an LP-gas cargo tank and does not transport or contemplate the transportation of LP-gas by vehicle in any manner, may make and file with the division..."

§ 131.002  DECLARATION OF POLICY

The legislature finds and declares that:

(1) The extraction of minerals by surface mining operations is a basic and essential activity making an important contribution to the economic well-being of the state and nation;

(2) Proper reclamation of surface-mined land is necessary to prevent undesirable land and water conditions that would be detrimental to the general welfare, health, safety, and property rights of the citizens of this state;

(3) Surface mining takes place in diverse areas where the geologic, topographic, climatic, biological, and social conditions are significantly different and that reclamation operations and the specifications for reclamation operations must vary accordingly;

(4) It is not always possible to extract minerals required by our society without disturbing the surface of the earth and producing waste materials, and the very character of certain types of surface mining operations occasionally precludes complete restoration of the affected land to its original condition;

(5) Unregulated surface mining may destroy or diminish the utility of land for commercial, industrial, residential, recreational, agricultural, and forestry purposes by causing erosion and landslides, by contributing to floods, by polluting the water, by destroying fish and wildlife habitats, by impairing natural beauty, by damaging the property of citizens, by creating hazards dangerous to life and property, by degrading the quality of life in local communities, and by counteracting governmental programs and efforts to conserve soil, water, and other natural resources, which results are declared to be inimical to the public interest and destructive to the public health, safety, welfare, and economy of the State of Texas;

(6) Due to its unique character or location, some land within the state may be unsuitable for all or certain types of surface mining operations;

(7) Reclamation of surface-mined land as provided by this chapter will allow the mining of valuable minerals in a manner designed for the protection and subsequent beneficial use of land; and

(8) The requirements of this chapter for reclamation and maintenance of affected land are necessary for the public health and safety and thus constitute a valid application of the police power of this state.

§ 131.003  Purposes

It is declared to be the purpose of this chapter:

(1) to prevent the adverse effects to society and the environment resulting from unregulated surface mining operations as defined in this chapter;

(2) to assure that the rights of surface landowners and other persons with a legal interest in the land or appurtenances to the land are protected from unregulated surface mining operations;

(3) to assure that surface mining operations are not conducted where reclamation as required by this chapter is not possible;

(4) to assure that surface mining operations are conducted in a manner that will prevent unreasonable degradation of land and water resources; and

(5) to assure that reclamation of all surface-mined land is accomplished as contemporaneously as practicable with the surface mining, recognizing that the extraction of minerals by responsible mining operations is an essential and beneficial economic activity.

[Acts 1977, 65th Leg., p. 2608, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 131.004  Definitions

In this chapter:

(1) “Minerals” means uranium and uranium ore.

(2) “Surface mining” means the mining of minerals by removing the overburden lying above the natural deposit of minerals and mining directly from the natural deposits that are exposed and those aspects of underground mining having significant effects on the surface: provided, this definition shall not be construed to include in situ mining activities associated with the removal of uranium or uranium ore.

(3) “Exploration activity” means the disturbance of the surface or subsurface for the purpose of or related to determining the location, quantity, or quality of a mineral deposit.

(4) “Affected land” or “land affected” means:

(A) the area from which any materials are to be or have been displaced in a surface mining operation;

(B) the area on which any materials that are displaced are to be or have been deposited;

(C) the haul roads and impoundment basins within the surface mining area; and

(D) other land whose natural state has been or will be disturbed as a result of the surface mining operations.

(5) “Surface mining operation” means those activities conducted at or near the mining site and concomitant with the surface mining, including extraction, storage, processing, and shipping of minerals and reclamation of the land affected.

(6) “Operator” means the individual or entity, including any public or governmental agency, that is to engage or that is engaged in a surface mining operation, including any individual or entity whose permit has expired or been suspended or revoked.

(7) “Overburden” means all materials displaced in a mining operation which are not, or will not be, removed from the affected area.

(8) “Reclamation” means the process of restoring an area affected by a surface mining operation to its original or other substantially beneficial condition, considering past and possible future uses of the area and the surrounding topography.

(9) “Topsoil” means the unconsolidated mineral matter naturally present on the surface of the earth which has been subjected to and influenced by genetic and environmental factors of parent material, climate, macroorganisms and microorganisms, and topography, all acting over a period of time, and which is necessary for the growth and regeneration of vegetation on the surface of the earth.

(10) “Surface mining permit” means the written certification by the commission that the named operator may conduct the surface mining operations described in the certification during the term of the surface mining permit and in the manner established in the certification.

(11) “Person affected” means any person who is a resident of a county or any county adjacent or contiguous to the county in which a mining operation is or is proposed to be located, including any person who is doing business or owns land in the county or adjacent or contiguous county and any local government and who demonstrates that he has suffered or will suffer actual injury or economic damage.

(12) “Commission” means the Railroad Commission of Texas.

(13) “Fund” means the Land Reclamation Fund.

(14) “Toxic material” means any substance present in sufficient concentration or amount to cause injury or illness to plant, animal, or human life.

(15) “Approximate original contour” means that surface configuration achieved by backfilling and grading of the surface-mined area so that it resembles the surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain, with all highwalls, spoil piles, and depressions eliminated, although the new contour may subsequently be at a moderately lower or higher elevation than existed prior to the surface mining operation.

(16) “Person” means an individual, partnership, society, jointstock company, firm, company, corporation, business organization, governmental agency, or any organization or association of citizens.

(17) “Party to the administrative proceedings” means any person who has participated in a public hearing or filed a valid petition or timely objection pursuant to any provision of this chapter.
§ 131.005. Reclamation

(a) The basic objective of reclamation is to reestablish on a continuing basis, where required, vegetation and other natural conditions consistent with the anticipated subsequent use of the affected land.

(b) The process of reclamation may include contouring, terracing, grading, backfilling, resoiling, revegetation, compaction and stabilization and settling ponds, water impoundments, diversion ditches, and other water treatment facilities in order to minimize water diminution to existing water sources, pollution, soil and wind erosion, or flooding resulting from mining or any other activity that may be considered necessary to accomplish the reclamation of the land affected to a substantially beneficial condition.

§ 131.006. Exclusions and Exemptions

The provisions of this chapter do not apply to the following:

(1) surface mining operations conducted on public land regulated by the General Land Office if the land is reclaimed in a manner consistent with this chapter; and

(2) land on which the overburden has been removed and minerals have been produced before June 21, 1975.

(18) "Permit area" means all the area designated as such in the permit application and shall include all land affected by the surface mining operations during the term of the permit and may include any contiguous area that the operator proposes to surface mine after that time.

[Acts 1977, 65th Leg., p. 2608, ch. 871, art. 1, § 1, eff. Sept. 1, 1977. Amended by Acts 1979, 66th Leg., p. 308, ch. 141, § 2(a)(5). Said amendment was subsequently repealed by identical provisions of Acts 1979, 66th Leg., p. 308, ch. 141, § 43, and Acts 1979, 66th Leg., p. 854, ch. 379, § 7, which provided in part that the repeal does not affect the continued validity of subds. (2) and (5) of this section or amendments to them made by the 66th Legislature, Regular Session, 1979.]

SUBCHAPTER B. POWERS AND DUTIES OF THE COMMISSION

§ 131.021. General Authority of Commission

The repealed sections, relating to promulgation and filing of rules, requirement of a public hearing, notice of hearing, written comments and evidence, consideration of comments and data, duty to publish rules, and amending and repealing rules, respectively, were derived from Acts 1977, 65th Leg., p. 2612, ch. 871, art. I, § 1.

§ 131.033. Differing Terms and Provisions of Rules
A rule or an amendment of a rule adopted by the commission may differ in its terms and provisions between particular conditions, particular mining techniques, particular areas of the state, or any other conditions that appear relevant and necessary so long as the action taken is consistent with attainment of the general intent and purposes of this chapter.

§ 131.034. Exploration Activities
The commission shall promulgate rules in the manner provided in Sections 131.026 through 131.031 of this code for the conduct of exploration activities.

§ 131.035. Rules Designating Unsuitable Land
(a) The commission shall develop rules that adopt appropriate procedures for identifying and designating land in this state as unsuitable for all or certain types of surface mining in accordance with Sections 131.036 through 131.041 of this code.
(b) The rules shall be in sufficient detail to provide reasonable notice to prospective operators of areas that might be designated as unsuitable for surface mining.

§ 131.036. Survey of Land
(a) When application is made to conduct surface mining operations and before a permit is issued, the commission shall immediately have the areas to be included in the proposed permit surveyed in accordance with the requirements of Sections 131.035 and 131.037 through 131.041 of this code.
(b) In conducting the survey and in declaring various areas to be unsuitable for mining, the commission shall employ competent and scientifically sound data and information as the basis for objective decisions with respect to each area surveyed.

§ 131.037. Commission Statement
Before designating a land area as unsuitable for surface mining operations, the commission shall prepare a detailed statement on the potential mineral and other resources in the area, the demand for these resources, and the impact of the designation on the environment, the economy, and the supply of the mineral.

§ 131.038. Reasons for Unsuitable Designation
After the survey is made, an area may be designated unsuitable for all or certain types of surface mining if:

(a) the commission determines that reclamation under this chapter is not feasible;

(b) the operations will result in significant damage to important areas of historic, cultural, or archaeological value or to important natural systems;

(c) the operations will affect renewable resource land that includes aquifers and aquifer recharge areas, resulting in a substantial loss or reduction of long-range productivity of water supply or food or fiber products;

(d) the operations are located in an area subject to frequent flooding or an area that is geologically unstable and may reasonably be expected to endanger life and property;

(e) the operations will adversely affect any national park, national monument, national historic landmark, property listed on the national register of historic places, national forest, national wilderness area, national wildlife refuge, national wild and scenic river area, state park, state wildlife refuge, state forest, recorded Texas historic landmark, state historic site, state archaeological landmark, or city or county park; or

§ 131.039. Petition and Hearing on Designation
(a) Any person is entitled to petition the commission to have an area designated as unsuitable for surface mining operations or to have the designation terminated.

(b) The petition shall include allegations of facts with supporting evidence that in the opinion of the commission would tend to establish the allegations.

(c) The commission shall make a determination of the validity of the petition, and if the petition is found to be valid, it shall be kept on file by the commission and made available for public inspection.

(d) On application for a surface mining permit for which a valid petition has been filed, the commission shall hold a public hearing as provided in Section 131.163 of this code in the locality of the proposed mining operation.

(e) Any person affected may intervene before the public hearing by filing allegations of facts with supporting evidence that would tend to establish the allegations.

(f) If all the petitioners and the applicant stipulate agreement before the requested hearing, the hearing does not have to be held.

§ 131.040. Modifying, Amending, and Terminating Designations
The commission may modify, amend, or terminate a designation pursuant to the requirements of Sections 131.035 through 131.039 of this code.

§ 131.041. Applicability of Subchapter
The provisions of Sections 131.035 through 131.040 of this code do not apply to land on which surface mining operations were being conducted on June 21, 1975.

§ 131.042. Records, Reports, Monitoring Equipment, and Information
The commission shall require each permittee to:

(a) establish and maintain appropriate records;

(b) make reports as frequently as the commission may prescribe;

(c) install, use, and maintain necessary monitoring equipment for observing and determining relevant surface or subsurface effects of the mining operation and reclamation program; and

(d) provide other information relative to mining and reclamation operations the commission determines to be reasonable and necessary.

§ 131.043. Inspection by Commission
Without advance notice and on presentation of appropriate credentials to the operation supervisor, if present, the authorized representatives of the commission are entitled to enter, on, or through a surface mining operation or premises in which any records required under Section 131.042 of this code are located, and may at reasonable times and without delay have access to and copy any records and inspect monitoring equipment or methods of operation required under this chapter.

§ 131.044. Time and Procedures for Inspections
(a) The inspections by the commission shall occur on an irregular basis at a frequency necessary to insure compliance with the intent and purposes of this chapter and the commission's rules for the surface mining and reclamation operations covered by each permit.

(b) The inspections shall occur only during normal operating hours if practicable and without prior notice to the permittee or his agents or employees.

(c) An inspection shall include the filing of an inspection report adequate to enforce the requirements of and to carry out the terms and purposes of this chapter. The commission shall make each re-

port a part of the record and furnish one copy of the report to the operator.

(d) Insofar as practicable, the commission shall establish a system of rotation of inspectors.

§ 131.045. Sign

Each permittee shall maintain at the entrances to the surface mining and reclamation operations a clearly visible sign that sets forth the name, business address, and phone number of the permittee and the number of the surface mining and reclamation operations.

§ 131.046. Procedure on Detection of Violation

On detection of each violation of a requirement of this chapter, each inspector shall inform the operator of the violation orally at the time of the detection and in writing at a later time and shall report the violation in writing to the commission.

§ 131.047. Judicial Review

(a) Any party to the administrative proceedings whose interest is or may be adversely affected by a ruling, order, decision, or other act of the commission may appeal by filing a petition in a district court of Travis County or in the county in which the greater portion of the land in question is located.
(b) The plaintiff shall pursue his action with reasonable diligence, and if the plaintiff does not prosecute his action within one year after the action is filed, the court shall presume that the action has been abandoned. The court shall dismiss the suit on a motion for dismissal made by the attorney general unless the plaintiff, after receiving due notice, can show good and sufficient cause for the delay.
(c) The court shall hear the complaint solely on the record made before the commission. The findings of the commission, if supported by substantial evidence on the record considered as a whole, shall be upheld.
(d) The court may, under conditions it may prescribe, grant temporary relief that it considers appropriate pending final determination of the proceedings.
(e) The commencement of a proceeding under this section shall not, unless specifically ordered by the court, operate as a stay of the action, order, or decision of the commission.

§ 131.048. Confidentiality

Information submitted to the commission concerning mineral deposits, test borings, core samplings, or trade secrets or privileged commercial or financial information relating to the competitive rights of the applicant and specifically identified as confidential by the applicant, if not essential for public review as determined by the commission, shall not be disclosed by any member, agent, or employee of the commission.

§ 131.049. Temporary Orders Prior to Notice and Hearing

(a) The commission may issue temporary orders relating to a surface mining operation without notice and hearing, or with the notice and hearing as the commission considers practical under the circumstances, when necessary to enable action to be taken more expeditiously than is otherwise provided by this chapter to effectuate the policy and purposes of this chapter.
(b) If the commission issues a temporary order under this authority without a hearing, and if the subject matter of the order is such as to require a public hearing under Section 131.163 of this code or under any rule of the commission, the order shall set a time and place for a public hearing to be held. The hearing shall be held as soon after the temporary order is issued as is practical.
(c) At the hearing, the commission shall affirm, modify, or set aside the temporary order. If the nature of the commission’s action requires, further proceedings shall be conducted as appropriate under provisions of the Administrative Procedure and Texas Register Act, as amended (Article 6252-13a, Vernon’s Texas Civil Statutes).
(d) The requirements of Sections 131.159 and 131.160 of this code relating to the time for notice, newspaper notice, and method of giving a person notice do not apply to the hearing, but general notice of the hearing shall be given that the commission considers practical under the circumstances.

SUBCHAPTER C. PLANS AND STANDARDS

§ 131.101. Reclamation Plan

(a) A reclamation plan shall be developed in a manner consistent with local, physical, environmental, and climatological conditions and current mining and reclamation technologies.
(b) A reclamation plan submitted as part of a permit application shall include:
§ 131.102. Reclamation Standards

(a) A permit issued under this chapter to conduct surface mining operations shall require that the surface mining operations meet all applicable reclamation standards of this chapter and any other requirements that the commission establishes by rule.

(b) Reclamation standards shall apply to all surface mining and reclamation operations that are not exempted or excluded and shall require the operator as a minimum to:

1. conduct surface mining operations in a manner consistent with prudent mining practice, so as to maximize the utilization and conservation of the resource being recovered so that reaffecting the land in the future through surface mining can be minimized;

2. restore the land affected to the same or a substantially beneficial condition considering the present and past uses of the land, so long as the condition does not present any actual or probable hazard to public health or safety or pose an actual or probable threat of water diminution or pollution, and the permit applicants' declaration anticipated land use following reclamation is not considered to be impractical or unreasonable, to involve unreasonable delay in implementation, or to violate federal, state, or local law, provided that a variety of postmining land conditions that differ from the land condition immediately preceding the surface mining operation, including but not limited to stock ponds, fishing or recreational lakes, school or park sites, industrial, commercial, or residential sites, or open space uses, may be approved by the commission if the proposed condition is determined to be substantially beneficial and complies with the provisions of this section;

3. reduce all highwalls, spoil piles, and banks to a degree to control erosion effectively and sufficiently to sustain vegetation, where required, consistent with the anticipated subsequent use of the affected land, provided that backfilling, compacting, and grading shall be required to restore the approximate original contour where required by federal law and where the volume of overburden is large in comparison to the volume of mineral deposit and the commission considers the requirement to be practical;

4. stabilize and protect all surface areas affected by the mining and reclamation operation effectively to control erosion and attendant air and water pollution;

5. remove the topsoil, if any, from the land in a separate layer, replace it on the backfill area, or if not utilized immediately, segregate it in a separate pile from other spoil and when the topsoil is not replaced on a backfill area within a time short enough to avoid deterioration of the topsoil, maintain a successful cover by quick growing plants or other means so that the topsoil is preserved from wind and water erosion, remains free of any contamination by toxic material, and is in a usable condition for sustaining vegetation when restored during reclamation, except if topsoil is of insufficient quantity or of poor quality for sustaining vegetation and if other strata can be shown to be as suitable for vegetation requirements, then the operator shall remove, segregate, and preserve in a like manner the other strata which is best able to support vegetation, provided that the requirements of this provision shall not apply if a mixing of strata can be shown to be equally suitable for revegetation requirements;

6. replace the topsoil or the best available subsoil, if any, on top of the land to be reclaimed;

7. fill any auger holes with an impervious material in order to prevent drainage;

8. minimize the disturbances to the prevailing hydrologic balance at the mine site and in associated offsite areas and to the quality and quantity...
§ 131.102  NATURAL RESOURCES CODE

of water in surface and groundwater systems both during and after surface mining operations and during reclamation by:

(A) avoiding toxic mine drainage by such measures as:

(i) preventing or removing water from contact with toxic-producing deposits,
(ii) treating drainage to reduce toxic content,
(iii) casing, sealing, or otherwise managing boreholes, shafts, and wells to keep toxic drainage from entering ground and surface water;

(B) conducting surface mining operations in a manner to prevent unreasonable additional contributions of suspended solids to streamflow or runoff outside the permit area above natural levels under seasonal flow conditions;

(C) removing temporary or large siltation structures from drainways consistent with good water conservation practices after disturbed areas are revegetated and stabilized; or

(D) other actions as the commission may prescribe pursuant to its rules;

(9) stabilize any waste piles;

(10) refrain from surface mining in proximity to active and abandoned underground mines in which mining would cause breakthroughs or would endanger the health or safety of miners;

(11) incorporate with respect to the use of impoundments for the disposal of mine wastes, processing wastes, or other liquid or solid wastes current engineering practices for the design and construction of water retention facilities which, at a minimum, shall be compatible with the requirements of Section 6.0731, Water Code, and applicable federal laws, ensure that leachate will not pollute surface or groundwater, and locate impoundments so as not to endanger public health and safety should failure occur;

(12) ensure that all debris, toxic materials, or materials constituting a fire hazard are treated or disposed of in a manner designed to prevent contamination of ground or surface water or combustion;

(13) ensure that any explosives are used only in accordance with existing state and federal law and rules promulgated by the commission;

(14) ensure that all reclamation efforts proceed as contemporaneously as practicable with the surface mining operations;

(15) ensure that construction, maintenance, and postmining conditions of access roads into and across the site of operations will minimize erosion and siltation, pollution of air and water, damage to fish or wildlife or their habitat, or public or private property, provided that the commission may permit the retention after mining of certain access roads if compatible with the approved reclamation plan;

(16) refrain from the construction of roads or other access ways up a streambed or drainage channel or in proximity to such channel where such construction would seriously alter the normal flow of water;

(17) establish on all affected land, where required in the approved reclamation plan, a diverse vegetative cover native to the affected land where vegetation existed prior to mining and capable of self-regeneration and plant succession equal in extent of cover to the natural vegetation of the area, except that introduced species may be used in the revegetation process where desirable or necessary to achieve the approved reclamation plan;

(18) assume responsibility for successful revegetation for a period of four years beyond the first year in which the vegetation has been successfully established as evidenced by the land being used as anticipated in the reclamation plan;

(19) ensure with respect to permanent impoundments of water as part of the approved reclamation plan that:

(A) the size of the impoundment and the availability of water are adequate for its intended purpose;

(B) the impoundment dam construction will meet the requirements of Section 6.0731, Water Code, and applicable federal laws;

(C) the quality of impounded water will be suitable on a permanent basis for its intended use and the discharges from the impoundment will not degrade the water quality in the receiving stream;

(D) final grading will provide adequate safety and access for anticipated water users; and

(E) the water impoundments will not result in the diminution of the quality or quantity of water utilized by adjacent or surrounding landowners for agricultural, industrial, recreational, or domestic uses; and

(20) meet other criteria pursuant to the commission's rules as are necessary to achieve reclamation in accordance with the purposes of this chapter, taking into consideration the physical, climatological, and other characteristics of the site.

The purpose of this section is to have land affected restored to the same condition as the land that existed enjoyed before the mining or some substantially beneficial condition.

(d) A method of reclamation other than that provided in this section may be approved by the commission after public hearing if the commission determines that any method of reclamation required by this section is not practical and that the alternative method will provide for the affected land to be restored to a substantially beneficial condition.

(e) If an alternative method of reclamation is generally applicable to all surface mining operations
§ 131.131. Permit Required for Operation

(a) No person shall conduct a surface mining operation unless he first obtains a surface mining permit issued by the commission under this subchapter; provided, any operator conducting a surface mining operation in this state before September 20, 1976, who has filed a permit application pursuant to this chapter, may continue to conduct that surface mining operation until the commission approves or denies his application.

(b) An operator who was conducting a surface mining operation in this state after the expiration of 180 days following the promulgation of the initial rules under Section 131.026 of this code and who has filed a permit application in accordance with the provisions of this subchapter may continue to conduct the surface mining operation until the commission approves or denies his application.

Amendment by Acts 1977, 65th Leg., p. 1321, ch. 524, § 3

Acts 1977, 65th Leg., p. 1231, ch. 524, § 3, purports to amend subsec. (a) of § 8 of Civil Statutes, art. 5429b-2 [now, this section], without reference to repeal of said article by Acts 1977, 65th Leg., p. 2690, ch. 871, art. I, § 2(a)(5). As so amended, subsec. (a) reads:

“No person shall conduct any surface mining operation without having first obtained a surface mining permit issued by the commission pursuant to this Act; provided, however, that any operator conducting a surface mining operation in this state before September 20, 1976, who has filed a permit application in accordance with the provisions of this Act may continue to conduct such surface mining operation until such time as the commission approves or denies his application.”

§ 131.132. Form of Permit Application

On application to the commission for a surface mining permit, an operator shall submit three copies of a permit application on a form prescribed by the commission, and the commission shall require in the form the information it considers reasonably necessary to process the application and to ensure compliance with the provisions of this chapter.

§ 131.133. Required Information

The permit application shall include information concerning:

1. The name, address, ownership, and management officers of the permit applicant and affiliated persons engaged in surface mining;

4. Current or previous surface mining permits held by the applicant, including any revocations, suspensions, or bond forfeitures;

5. The type and method of surface mining operation, the engineering techniques, and the equipment that is proposed to be used, including mining schedules, the nature and expected amount of overburden to be removed, the depth of excavations, a description of the affected land and permit area, the results of any test borings, test pits, or core samplings that have been gathered from the permit area, and the anticipated hydrologic consequences of the mining operation;

(b) A combined permit application shall require the same detailing of information as required by this subchapter for each separate location.

(c) An operator desiring to operate under a combined permit may submit a consolidated reclamation plan covering all his operations under rules prescribed by the commission, but he may be required to furnish specific information relating to reclamation of a single operating area if the commission determines that this is necessary to carry out the purposes of this chapter.

(d) Except as provided in this section, each surface mining operation submitted as part of a combined permit application shall be separate and independent of all other surface mining operations included in the same permit application.

(e) The commission may approve or deny an individual surface mining operation and the reclamation plan that relates to an individual surface mining operation without affecting other portions of the same permit application.

§ 131.138. Filing Application With County Clerk

After deleting confidential information as provided in Section 131.048 of this code, the commission shall file for public inspection with the county clerk at the county courthouse of the county in which any portion of the mining is proposed to occur a copy of each application.

(c) An agency's comments shall include an enumeration of permits or licenses required under the agency's jurisdiction.

(d) The comments of each agency shall be made a part of the record and a copy shall be furnished to the applicant.

§ 131.140. Approval of Permit

(a) The commission shall grant a surface mining permit if it is established that the permit application complies with the requirements of this chapter and applicable federal and state laws.

(b) The commission may approve a surface mining permit conditioned on the approval of other state permits or licenses that may be required.

§ 131.141. Denial of a Permit

The commission shall deny a permit if:

(1) it finds that the reclamation as required by this chapter cannot be accomplished by means of the proposed reclamation plan;

(2) part of the proposed operation lies within an area designated as unsuitable for surface mining in Sections 131.035 through 131.041 of this code;

(3) it is advised by the Texas Water Quality Board that the proposed mining operation will cause pollution of water of the state, or by the Texas Air Control Board that the proposed mining operation will cause pollution of the ambient air of the state, in violation of the laws of this state;
§ 131.142. Term and Transferability of Permit

(a) A surface mining permit issued under this chapter for uranium and uranium ore shall be issued for a term of not more than 10 years.

(b) Except as provided in Sections 131.155 through 131.158 of this code, a surface mining permit is nontransferable.

(a) After a permit application is approved but before the permit is issued, the applicant shall file a certificate of insurance certifying that the applicant has in force a public liability insurance policy issued by an insurance company authorized to conduct business in this state.

(b) The liability insurance policy required by Subsection (a) of this section shall cover all surface mining operations of the applicant in this state and shall afford bodily injury protection and accidental business property damage protection in an amount determined by the commission to compensate adequately any persons damaged as a result of surface mining and reclamation operations.

(c) The liability insurance policy shall be maintained in full force and effect during the term of the permit or the renewal of the permit, including the length of all reclamation operations.

§ 131.144. Rules for Revision, Transfer, and Renewal of Permits

The commission shall promulgate rules for renewal, revision, and transfer of surface mining permits.

§ 131.145. Right to Renewal

A valid surface mining permit issued under this chapter carries with it the right of successive renewal on expiration with respect to area within the boundaries of the existing permit.

§ 131.146. Application for and Issuance of Renewal

The holder of a permit may apply for renewal and the renewal shall be issued on the basis of the following requirements and written findings by the commission that:

(1) The terms and conditions of the existing permit are being satisfactorily met;

(2) The performance bond or substitute collateral required under the terms of this chapter will continue in full force and effect and unimpaired for the requested renewal, revision, or transfer;

(3) The operator has provided additional or revised information as required by the commission; and

(4) Notice under Section 131.159 of this code has been provided with respect to the application for renewal, revision, or transfer.

§ 131.147. Renewal Application Fee

(a) Each application for renewal of a surface mining permit shall be accompanied by a renewal application fee as determined by the commission in accordance with a published fee schedule.

(c) The approved application fee as provided in Section 131.135 of this code is not applicable to a renewal application except for the portion, if any, that addresses any new land areas.

§ 131.148. Extension of Permit Coverage

If an application for renewal of a valid permit includes a proposal to extend the mining operation beyond the boundaries authorized in the existing permit, the portion of the application for renewal of a valid permit that addresses any new land areas shall be subject to the full standards, including application fees, applicable to new applications under this chapter.

SUBCHAPTER E. BONDS AND DEPOSITS

§ 131.201. Performance Bond Requirement

(a) After a surface mining permit application has been approved but before the permit is issued, the applicant shall file with the commission, on a form prescribed by rule, a bond for performance payable to the State of Texas and conditioned on full and faithful performance of all the requirements of this chapter and the permit.

(b) The bond shall cover that area of land within the permit area on which the operator will initiate and conduct surface mining and reclamation operations, and as succeeding increments of surface mining and reclamation operations are to be initiated and conducted within the permit area, the operator shall file with the commission an additional bond or bonds to cover the increments in accordance with Sections 131.202 through 131.206 of this code.

§ 131.202. Amount of Performance Bond

(a) The amount of the bond required for each bonded area depends on the reclamation requirements of the approved permit and shall be determined by the commission.

(b) The commission's determination shall be based on at least two independent estimates, one of which shall be submitted by the permit applicant and the other prepared at the commission's direction under procedures established by rule. Only one independent estimate need be submitted if the applicant waives his right to submit an estimate.
§ 131.202  NATURAL RESOURCES CODE

(c) The amount of the bond shall be determined by the commission and shall be sufficient to assure the completion of the reclamation plan if the work had to be performed by a third party in the event of forfeiture, but in no event shall the bond exceed the highest independent estimate made under this section.  

§ 131.203.  Bond Without Surety  
The commission may accept the bond of the operator itself, without separate surety, if the operator demonstrates to the satisfaction of the commission the existence of a suitable agent to receive service of process and a history of financial solvency and continuous operation sufficient to self-insure or bond the amount.  

§ 131.204.  Extent of Liability Under Bond  
Liability under the bond shall be for the duration of surface mining and reclamation operations and for a period coincident with the operator's responsibility pursuant to Section 131.102 of this code.  

§ 131.205.  Security for Bond  
(a) The bond shall be executed by the operator and a corporate surety licensed to do business in this state, or the operator may elect to deposit cash or negotiable securities acceptable to the commission, or an assignment of a savings account in a Texas bank on an assignment deposit form prescribed by the commission's rules.  
(b) A cash deposit or market value of the substitute collateral shall be equal to or greater than the amount of the bond required for the bonded area.  
(c) Cash or other substitute collateral shall be deposited on the same terms as the terms on which surety bonds may be deposited.  

§ 131.206.  Increase or Decrease of Bond  
(a) The amount of the bond or deposit required and the terms of acceptance of the applicant's bond or substitute collateral may be increased or decreased from time to time to reflect changes in the cost of future reclamation of land mined or to be mined.  
(b) The amount of the bond or substitute collateral may be reduced only in accordance with the provisions of Sections 131.208 through 131.213 of this code.  

§ 131.207.  Forfeiture of Operator's Performance Bond  
On issuance of a final order revoking an operator's permit for failure to comply with an order of the commission to take action as required by this chapter or rules adopted under this chapter, the operator's performance bond shall be forfeited if it is determined that forfeiture is necessary to reclaim land disturbed by the operator's surface mining operation.  

§ 131.208.  Application for Release of Performance Bond or Deposit  
(a) At any time, an operator may file an application with the commission for the release of all or part of the performance bond or deposit.  
(b) The application shall be on a form prescribed by the commission and in addition to other information the commission may require, shall include the type and the approximate date of reclamation work performed and a description of the results achieved as they relate to the operator’s reclamation plan.  
(c) The commission shall file a copy of the bond release application for public inspection with the county clerk at the county courthouse of the county in which the surface mining and reclamation operation is located.  

§ 131.209.  Notice  
(a) The operator shall submit a copy of a notice that has been published once a week for four consecutive weeks in the newspaper of greatest general circulation in the locality of the surface mining and reclamation operation.  
(b) The advertisement shall be considered part of any bond release application and shall include:  
(1) notice of the location and boundaries of the land affected;  
(2) the permit number and the date approved;  
(3) the amount of the bond filed and the portion sought to be released; and  
(4) the location at which the bond release application has been placed for public inspection.  

(a) On receipt of the notice and request, the commission shall conduct an inspection and evaluation of the reclamation work involved, the inspection and evaluation to occur within a reasonable time not to exceed 45 days.  
(b) The evaluation shall consider among other things:  
(1) the degree of difficulty to complete remaining reclamation;
§ 131.211. Basis for Release of Bond or Deposit

The commission may release in whole or part the bond or deposit if it is satisfied that reclamation covered by the bond or deposit or a portion of the bond or deposit has been accomplished as required by this chapter according to the following schedule:

1. When the operator completes required backfilling, regrading, and drainage control of a bonded area as provided in his approved reclamation plan, the commission may authorize the release of up to 75 percent of the bond or substitute collateral for the applicable permit area, provided the amount of the unreleased portion of the bond or substitute collateral is not less than the amount necessary to assure completion of the reclamation work by a third party in the event of forfeiture; and

2. When the operator has successfully completed the remaining reclamation activities, but not before the expiration of the period specified for operator responsibility in Section 131.102 of this code, the commission may authorize the release of up to 75 percent of the bond or substitute collateral, provided that no bond is fully released until all reclamation requirements of this chapter are fully met.

(Acts 1977, 65th Leg., p. 2628, ch. 871, art. I, § 1, eff. Sept. 1, 1977.)

(b) The objections must be filed with the commission within 30 days after the last publication of notice as provided in Section 131.209 of this code.

SUBCHAPTER G. ENFORCEMENT

§ 131.261. Conditions, Practices, and Violations Creating Imminent Danger or Causing Imminent Harm

(a) On the basis of any inspection, if the commission or its authorized representative or agent determines that a condition or practice exists or that a permittee is in violation of a requirement of this chapter or a permit condition required by this chapter, and that this condition, practice, or violation also creates an imminent danger to the health or safety of the public or is causing or can reasonably be expected to cause significant imminent harm to land, air, or water resources, a member of the commission shall immediately order a cessation of surface mining operations on the portion of the area relevant to the condition, practice, or violation.

(b) The cessation order shall set a time and place for a hearing to be held before the commission and shall be held as soon after the order is issued as practicable.

(c) The requirements of Section 131.159 of this code relating to time for notice, newspaper notice, and method of giving notice do not apply to a hearing under this section, but general notice shall be given in the manner that the commission judges to be practicable under the circumstances.

(d) No more than 24 hours after the commencement of the hearing and without adjournment, the commission shall affirm, modify, or set aside the order.

[Acts 1977, 65th Leg., p. 2630, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 131.262. Violations Not Creating Imminent Danger or Causing Imminent Harm

(a) On the basis of an inspection, if the commission or its authorized representative or agent determines that a permittee is in violation of a requirement of this chapter or a permit condition required by this chapter, but the violation does not create an imminent danger to the health or safety of the public or is not causing or reasonably expected to cause significant imminent harm to land, air, or water resources, the commission shall issue a notice to the permittee or his agent setting a reasonable time not to exceed 30 days for the abatement of the violation.

(b) If, on expiration of the period of time as originally set or subsequently extended, for good cause shown, and on written finding of the commission, the commission finds that the violation has not been abated, it may order a cessation of surface mining operations on the portion of this area relevant to the violation. However, if requested by the operator, a hearing must be held prior to a commission finding or order.

(c) The cessation order shall remain in effect until the commission determines that the violation has been abated or until modified, vacated, or terminated by the commission under Section 131.263 of this code.

[Acts 1977, 65th Leg., p. 2631, ch. 871, art. 1, § 1, eff. Sept. 1, 1977.]

§ 131.263. Continuous Violations

(a) On the basis of an inspection, if the commission has reason to believe that a pattern of violations of any requirements of this chapter or any permit conditions required by this chapter exists or has existed, and if the commission also finds that these violations are caused by the unwarranted failure of the permittee to comply with requirements of this chapter or permit conditions or that the violations are wilfully caused by the permittee, the commission shall issue an order to the permittee forthwith to show cause as to why the permit should not be suspended or revoked.

(b) The order shall set a time and place for a public hearing to be held in accordance with the notice and procedural requirements of Sections 131.-159 through 131.164 of this code.

(b) The action shall be brought in a district court in Travis County or in the county in which the greater portion of the surface mining and reclamation operation is located.

(c) The court has jurisdiction to provide the relief that is appropriate, and relief granted by the court to enforce Subdivision (1) of Subsection (a) of this section shall continue in effect until the completion or final termination of all proceedings for review of the order under this chapter unless before that time the district court granting the relief sets the order aside or modifies it.

§ 131.266. Injunctive Relief and Civil Penalty

(a) The commission may have a civil suit instituted for injunctive relief to restrain a permittee from continuing a violation or threatening a violation or for the assessment of a civil penalty of not more than $5,000 as the court considers proper for each day of violation, or for both.

(b) In determining the amount of the civil penalty, consideration shall be given to:

132.003. Establishment and Duties of Texas Mining Council.
132.004. Membership of Texas Mining Council.
132.005. Terms of Office.
132.006. Compensation and Travel Expenses.
132.007. Membership in Employees Retirement System.
132.008. Filing Bylaws and Amendments.

§ 132.001. Adoption of Compact

The Interstate Mining Compact is enacted into law and entered into with all other jurisdictions legally joining in the compact in the form provided in Section 132.002 of this code.

Application of Sunset Act

Acts 1977, 65th Leg., p. 1841, ch. 735, § 2.063, purports to add § 1a to Acts 1975, 64th Leg., ch. 136 [now, this Chapter], without reference to repeal of said Act by Acts 1977, 65th Leg., p. 2690, ch. 871, art. I, § 2(a)(5). As so added, § 1a reads:

“The office of Interstate Mining Compact Commissioner for Texas is subject to the Texas Sunset Act [Civil Statutes, art. 5429k]; and unless continued in existence as provided by that Act the office is abolished, and this Act expires effective September 1, 1983.”

Section 3.11(c) of the Code Construction Act (Civil Statutes, art. 5429b–2) provides, in part, that the repeal of a statute by a code does not affect an amendment of the statute by the same legislature which enacted the code and that the amendment is preserved and given effect as part of the code provision.

§ 132.002. Text of Compact

The Interstate Mining Compact reads as follows:

INTERSTATE MINING COMPACT

ARTICLE I. FINDINGS AND PURPOSES

(a) The party states find that:

(1) Mining and the contributions thereof to the economy and well-being of every state are of basic significance.

(2) The effects of mining on the availability of land, water, and other resources for other uses present special problems which properly can be approached only with due consideration for the rights and interests of those engaged in mining, those using or proposing to use these resources for other purposes, and the public.

(3) Measures for the reduction of the adverse effects of mining on land, water, and other resources may be costly and the devising of means to deal with them are of both public and private concern.

(4) Such variables as soil structure and composition, physiography, climatic conditions, and the needs of the public make impracticable the application to all mining areas of a single standard for the conservation, adaptation, or restoration of mined land, or the development of mineral and other natural resources, but justifiable requirements of law and practice relating to the effects of mining on land, water, and other resources may be reduced in equity or effectiveness unless they pertain similarly from state to state for all mining operations similarly situated.

(5) The states are in a position and have the responsibility to assure that mining shall be conducted in accordance with sound conservation principles and with due regard for local conditions.

(b) The purposes of this compact are to:

(1) advance the protection and restoration of land, water, and other resources affected by mining;

(2) assist in the reduction or elimination or counteracting of pollution or deterioration of land, water, and air attributable to mining;

(3) encourage, with due recognition of relevant regional, physical, and other differences, programs in each of the party states which will achieve comparable results in protecting, conserving, and improving the usefulness of natural resources, to the end that the most desirable conduct of mining and related operations may be universally facilitated;

(4) assist the party states in their efforts to facilitate the use of land and other resources affected by mining, so that such use may be consistent with sound land use, public health, and public safety, and to this end to study and recommend, wherever desirable, techniques for the improvement, restoration, or protection of such land and other resources;

(5) assist in achieving and maintaining an efficient and productive mining industry and in increasing economic and other benefits attributable to mining.

ARTICLE II. DEFINITIONS

As used in this compact, the term:

(a) “Mining” means the breaking of the surface soil in order to facilitate or accomplish the extraction or removal of minerals, ores, or other solid matter, any activity or process constituting all or
part of a process for the extraction or removal of minerals, ores, and other solid matter from its original location, and the preparation, washing, cleaning, or other treatment of minerals, ores, or other solid matter so as to make them suitable for commercial, industrial, or construction use; but shall not include those aspects of deep mining not having significant effect on the surface, and shall not include excavation or grading when conducted solely in aid of on-site farming or construction.

(b) "State" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or a territory or possession of the United States.

ARTICLE III. STATE PROGRAMS

Each party state agrees that within a reasonable time it will formulate and establish an effective program for the conservation and use of mined land, by the establishment of standards, enactment of laws, or the continuing of the same in force, to accomplish:

(a) the protection of the public and the protection of adjoining and other landowners from damage to their land and the structures and other property thereon resulting from the conduct of mining operations or the abandonment or neglect of land and property formerly used in the conduct of such operations;

(b) the conduct of mining and the handling of refuse and other mining wastes in ways that will reduce adverse effects on the economic, residential, recreational, or aesthetic value and utility of land and water;

(c) the establishment of standards, enactment of laws, or the continuing of the same in force, to accomplish:

(d) gather and disseminate information relating to any of the matters within the purview of this compact;

(e) cooperate with the federal government and any public or private entities having interest in any subject coming within this purview of this compact;

(f) consult, on the request of a party state and within resources available therefor, with the officials of such state in respect to any problem within the purview of this compact;

(g) study and make recommendations with respect to any practice, process techniques, or course of action that may improve the efficiency of mining or the economic yield from mining operations;

(h) study and make recommendations relating to the safeguarding of access to resources which are or may become the subject of mining operations to the end that the needs of the economy for the products of mining may not be adversely affected by unplanned or inappropriate use of land and other resources containing minerals or otherwise connected with actual or potential mining sites.

ARTICLE IV. POWERS

In addition to any other powers conferred on the Interstate Mining Commission established by Article V of this compact, such commission shall have power to:

(a) study mining operations, processes, and techniques for the purpose of gaining knowledge concerning the effects of such operations, processes, and techniques on land, soil, water, air, plant and animal life, recreation, and patterns of community or regional development or change;

(b) study the conservation, adaptation, improvement, and restoration of land and related resources affected by mining;

(c) make recommendations concerning any aspect or aspects of law or practice and governmental administration dealing with matters within the purview of this compact;

(d) gather and disseminate information relating to any of the matters within the purview of this compact;

(e) cooperate with the federal government and any public or private entities having interest in any subject coming within the purview of this compact;

(f) consult, on the request of a party state and within resources available therefor, with the officials of such state in respect to any problem within the purview of this compact;

(g) study and make recommendations with respect to any practice, process techniques, or course of action that may improve the efficiency of mining or the economic yield from mining operations;

(h) study and make recommendations relating to the safeguarding of access to resources which are or may become the subject of mining operations to the end that the needs of the economy for the products of mining may not be adversely affected by unplanned or inappropriate use of land and other resources containing minerals or otherwise connected with actual or potential mining sites.
alternates, is present. The commission may establish and maintain such facilities as may be necessary for the transacting of its business. The commission may acquire, hold, and convey real and personal property and any interest therein.

(c) The commission shall have a seal.

d) The commission shall elect annually, from among its members, a chairman, a vice-chairman, and a treasurer. The commission shall appoint an executive director and fix his duties and compensation. Such executive director shall serve at the pleasure of the commission. The executive director, the treasurer, and such other personnel as the commission shall designate shall be bonded. The amount or amounts of such bond or bonds shall be determined by the commission.

(e) Irrespective of the civil service, personnel, or other merit system laws of any of the party states, the executive director with the approval of the commission, shall appoint, remove, or discharge such personnel as may be necessary for the performance of the commission's functions, and shall fix the duties and compensation of such personnel.

(f) The commission may establish and maintain independently or in conjunction with a party state, a suitable retirement system for its employees. Employees of the commission shall be eligible for social security coverage in respect of old age and survivor's insurance provided that the commission takes such steps as may be necessary pursuant to the laws of the United States, to participate in such program of insurance as a governmental agency or unit. The commission may establish and maintain or participate in such additional programs of employee benefits as it may deem appropriate.

(g) The commission may borrow, accept, or contract for the services of personnel from any state, the United States, or any other governmental agency, or from any person, firm, association, or corporation.

(h) The commission may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials, and service, conditional or otherwise, from any state, the United States, or any other governmental agency, or from any person, firm, association, or corporation, and may receive, utilize, and dispose of the same. Any donation or grant accepted by the commission pursuant to this paragraph or services borrowed pursuant to Paragraph (g) of this article shall be reported in the annual report of the commission. Such report shall include the nature, amount, and conditions, if any, of the donation, grant, or services borrowed and the identity of the donor or lender.

(i) The commission shall adopt bylaws for the conduct of its business and shall have the power to amend and rescind these bylaws. The commission shall publish its bylaws in convenient form and shall file a copy thereof and a copy of any amendment thereto, with the appropriate agency or officer in each of the party states.

(j) The commission annually shall make to the governor, legislature, and advisory body required by Article V(a) of each party state a report covering the activities of the commission for the preceding year, and embodying such recommendations as may have been made by the commission. The commission may make such additional reports as it may deem desirable.

ARTICLE VI. ADVISORY, TECHNICAL, AND REGIONAL COMMITTEES

The commission shall establish such advisory, technical, and regional committees as it may deem necessary, membership on which shall include private persons and public officials, and shall cooperate with and use the services of any such committees and the organizations which the members represent in furthering any of its activities. Such committees may be formed to consider problems of special interest to any party states, problems dealing with particular commodities or types of mining operations, problems related to reclamation, development, or use of mined land, or any other matters of concern to the commission.

ARTICLE VII. FINANCE

(a) The commission shall submit to the governor or designated officer or officers of each party state a budget of its estimated expenditures for such period as may be required by the laws of that party state for presentation to the legislature thereof.

(b) Each of the commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. The total amount of appropriations requested under any such budget shall be apportioned among the party states as follows: one-half in equal shares, and the remainder in proportion to the value of minerals, ores, and other solid matter mined. In determining such values, the commission shall employ such available public source or sources of information as, in its judgment, present the most equitable and accurate comparisons among the party states. Each of the commission's budgets of estimated expenditures and requests for appropriations shall indicate the source or sources used in obtaining information concerning value of minerals, ores, and other solid matter mined.

(c) The commission shall not pledge the credit of any party state. The commission may meet any of its obligations in whole or in part with funds available to it under Article V(h) of this compact; provided that the commission takes specific action setting aside such funds prior to incurring any obligation to be met in whole or in part in such manner. Except where the commission makes use of funds available to it under Article V(h) of this compact, the commission shall not incur any obligation prior to the allotment of funds by the party states adequate to meet the same.
The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission shall be subject to the audit and accounting procedures established under its bylaws. All receipts and disbursements of funds handled by the commission shall be audited yearly by a qualified public accountant and the report of the audit shall be included in and become part of the annual report of the commission.

(e) The accounts of the commission shall be open at any reasonable time for inspection by duly constituted officers of the party states and by any persons authorized by the commission.

(f) Nothing contained herein shall be construed to prevent commission compliance with laws relating to audit or inspection of accounts by or on behalf of any government contributing to the support of the commission.

ARTICLE VIII. ENTRY INTO FORCE AND WITHDRAWAL

(a) This compact shall enter into force when enacted into law by any four or more states. Thereafter, this compact shall become effective as to any other state on its enactment thereof.

(b) Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the governor of the withdrawing state has given notice in writing of the withdrawal to the governors of all other party states. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

ARTICLE IX. EFFECT ON OTHER LAWS

Nothing in this compact shall be construed to limit, repeal, or supersede any other law of any party state.

ARTICLE X. CONSTRUCTION AND SEVERABILITY

This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall be severable, and if any phrase, clause, sentence, or provision of this compact is declared to be contrary to the constitution of any state or of the United States, or the applicability thereof to any government, agency, person, or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state participating therein, the compact shall remain in full force and effect as to the remaining party states and in full force and effect as to the state affected as to all severable matters.

§ 132.007 Membership in Employees Retirement System

Application of Sunset Act

Acts 1977, 65th Leg., p. 1845, ch. 735, § 2.098, purports to add § 2(D) to Civil Statutes, art. 5421m, without reference to repeal of said article by Acts 1977, 65th Leg., p. 2689, ch. 871, art. I, § 2(a)(1). As so added, § 2(D) reads:

“The Veterans’ Land Board is subject to the Texas Sunset Act [Civil Statutes, art. 5429k], but it is not abolished under that Act. Section 3.11(c) of the Code Construction Act (Civil Statutes, art. 5429b–2) provides, in part, that the repeal of a statute by a code does not affect an amendment of the statute by the same legislature which enacted the code and that the amendment is preserved and given effect as part of the code provision.

At that time, the land and all payments previously made are forfeited.

Principal and interest that become delinquent shall bear interest at a rate fixed by the board from time to time but shall not be more than 10 percent a year from the date the principal and interest become delinquent until paid.

§ 161.321. Vacating Premises

If the board declares a forfeiture under a purchase contract, the purchaser shall vacate the premises within 45 days after the date of the letter giving notice of the declaration. The letter shall be sent by registered mail to the last known address of the purchaser.

SUBCHAPTER A. PURPOSE AND POLICY

§ 1.001. Purpose of Code

(a) This code is enacted as a part of the state’s continuing statutory revision program, begun by the Texas Legislative Council in 1963 as directed by the legislature in Chapter 488, Acts of the 58th Legislature, 1963 (Article 5429b-1, Vernon’s Texas Civil Statutes). The program contemplates a topic-by-topic revision of the state’s general and permanent statute law without substantive change.

(b) Consistent with the objectives of the statutory revision program, the purpose of this code is to make the general and permanent parks and wildlife law more accessible and understandable by:

(1) rearranging the statutes into a more logical order;
(2) employing a format and numbering system designed to facilitate citation of the law and to accommodate future expansion of the law;
(3) eliminating repealed, duplicative, unconstitutional, expired, executed, and other ineffective provisions; and
(4) restating the law in modern American English to the greatest extent possible.

[Acts 1975, 64th Leg., p. 1405, ch. 545, § 1, eff. Sept. 1, 1975.]

§ 1.002. Construction of Code

The Code Construction Act (Article 5429b–2, Vernon’s Texas Civil Statutes) applies to the construction of each provision in this code, except as otherwise expressly provided by this code.

[Acts 1975, 64th Leg., p. 1405, ch. 545, § 1, eff. Sept. 1, 1975.]

The director and the comptroller, or their authorized representatives, may examine any book, document, paper, and record of the recipient that are pertinent to assistance received under this chapter.

(c) The recipient of funds under this chapter shall, on each anniversary date of the grant for five years after the grant is made, furnish to the department a comprehensive report detailing the present and anticipated use of the property, any contiguous additions to the property, and any major changes in the character of the property, including the extent of park development which may have taken place.

Sections 5 and 6 of the 1981 amendatory act provide:
"Sec. 5. A proclamation that was adopted by the commission before the effective date of this Act, that purports to regulate the possession of wildlife resources, and that by its terms was in effect on the effective date of this Act is validated as of the effective date of this Act to the extent that it would have been valid if adopted on or after the effective date of this Act.

§ 61.053. Open Seasons

The commission shall provide open seasons for the taking or possession of wildlife resources if its investigations and findings of fact reveal that open seasons may be safely provided or if the threat of waste requires an open season to conserve wildlife resources.
§ 61.054. Proclamations of the Commission

(a) Regulation of the taking or possession of wildlife resources under this chapter shall be by proclamation of the commission.

(b) A proclamation of the commission authorizing the taking or possession of wildlife resources must specify:

The fact that a person was convicted of a violation of Section 62.003, 62.004, or 62.021, Parks and Wildlife Code, before the effective date of this Act does not preclude the use of that conviction for enhancing the punishment for a violation that occurs after the effective date of this Act.”

The fact that a person was convicted of a violation of Section 62.003, 62.004, or 62.021, Parks and Wildlife Code, before the effective date of this Act does not preclude the use of that conviction for enhancing the punishment for a violation that occurs after the effective date of this Act.”

(a) The commission shall issue permits for the taking of nongame fish in salt water to control nongame fish and to provide for their use when the commission finds that the taking will not adversely affect the conservation of game fish.
(b) The permit may authorize the use of nets, seines, and other devices that are otherwise prohibited, except that the commission may not authorize the use of a net or other device, the use of which was unlawful on May 26, 1941, in water in which the use of a trammel net, set net, or gill net was unlawful on that date. The permit shall specify the species of fish permitted to be taken.
(c) An applicant for a permit must:
(1) be a citizen of the United States and have resided in this state continuously for a period of at least six months before the date of the application; and
(2) not have been convicted of a violation of any fishing law of this state for a period of two years before the date of the application.
(d) The department shall collect a fee of $5 for the issuance of the permit.
(e) The permit is valid for one year from the date of its issuance unless it is revoked prior to its expiration.
(f) The department shall inspect, approve, and attach metal identification tags to all devices used under this section for taking fish.
[Acts 1975, 64th Leg., p. 1405, ch. 545, § 1, eff. Sept. 1, 1975.]

§ 66.212. Holders of Rough Fish Permits: Offenses

(3) use any device that would be prohibited except for the permit to take any game fish or any other species of fish not authorized to be taken by the permit;
(4) use any device that would be prohibited except for the permit in any manner that will or does carelessly or needlessly injure marine life other than those species authorized to be taken by the permit.
(b) A holder of a permit who violates this section is guilty of a misdemeanor and on conviction is punishable by a fine of not less than $200.
(c) An officer of the department who finds a device authorized by permit being used in violation of this section shall immediately seize the device and hold it until after the trial. (a) No person may possess a seine, strike net, gill net, or trammel net in or on the tidal water of this state where the use of the seine or net for the catching of fish is prohibited unless the seine or net is on board a vessel in port or in a channel and going directly to or from the Gulf of Mexico or going directly to or from other waters where the use of seines or nets is not prohibited. No person may possess or use for the purpose of catching finfish any seine, strike net, trammel net, or gill net in or on any waters of this state unless said seine, strike net, gill net, or trammel net is equipped with floats at intervals of six feet or less and of sufficient buoyancy to maintain the seine, strike net, gill net, or trammel net in an upright position in the water so that the floats are visible on the surface of the water thereby avoiding a hazard to motor boat traffic.
(b) A person who violates this section is guilty of a misdemeanor and on conviction is punishable by a fine of not less than $25 nor more than $200, and the person's commercial fishing license is subject to cancellation. A person whose license is cancelled under this section may not receive another license for one year from the date of the conviction.

§ 66.214. Monofilament Nets: Use for Catching Finfish
(a) In those coastal waters to which the Uniform Wildlife Regulatory Act (Chapter 61 of this code) is not applicable, no person may possess a monofilament net for the purpose of catching finfish.
(b) A person who violates this section is guilty of a misdemeanor punishable by a fine of $200. Each net possessed in violation of this section is a separate offense.

Section 16(b) of the 1981 amendatory act provides:

(b) A person who violates this section is guilty of a misdemeanor and on conviction is punishable by a fine of not less than $25 nor more than $200. Each fish possessed in violation of this section constitutes a separate offense.

§ 66.217. Finfish Research

(b) The department shall make findings and issue reports based on the research required by Subsection (a) of this section.

(c) The findings and reports shall be filed in the permanent records of the department.

(d) The reports and findings must include recommendations for opening or closing bay areas to the use of trawls, nets, and saltwater trotlines when the studies indicate appropriate action to prevent waste or avoid depletion of finfish.

(e) Before the convening of each regular session of the legislature, the department shall publish and present to the governor and the legislature a special report on studies, findings, recommendations, and actions taken under this subchapter.

GULF STATES MARINE FISHERIES COMPACT

The contracting states solemnly agree:

ARTICLE I

Whereas the Gulf Coast States have the proprietary interest in and jurisdiction over fisheries in the waters within their respective boundaries, it is the purpose of this compact to promote the better utilization of the fisheries, marine, shell and anadromous, of the seaboard of the Gulf of Mexico, by the development of a joint program for the promotion and protection of such fisheries and the prevention of the physical waste of the fisheries from any cause.

ARTICLE II

This compact shall become operative immediately as to those states ratifying it whenever any two or more of the states of Florida, Alabama, Mississippi, Louisiana and Texas have ratified it and the Congress has given its consent, pursuant to Article I, Section 10 of the Constitution of the United States. Any state contiguous to any of the aforementioned states or riparian upon waters which flow into waters under the jurisdiction of any of the aforementioned States and which are frequented by anadromous fish or marine species, may become a party hereto as hereinafter provided.

ARTICLE III

Each state joining herein shall appoint three representatives to a commission hereby constituted and designated as the Gulf States Marine Fisheries Commission. One shall be the head of the administrative agency of such State charged with the conservation of the fishery resources to which this compact pertains; or, if there be more than one officer or agency, the official of that State named by the Governor thereof. The second shall be a member of the Legislature of such State designated by such Legislature, or in the absence of such designation, such legislator shall be designated by the Governor thereof; provided that if it is constitutionally impossible to appoint a legislator as a commissioner from such State, the second member shall be appointed in such manner as may be established by law. The third shall be a citizen who shall have a knowledge of and interest in the marine fisheries, to be appointed by the Governor. This commission shall be a body corporate with the powers and duties set forth herein.

ARTICLE IV

The duty of the said commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances and conditions as may be disclosed for bringing about the conservation and the prevention of the depletion and physical waste of the fisheries, marine, shell and anadromous, of the Gulf Coast. The commission shall have power to recommend the coordination of the exercise of the police powers of the several States within their respective jurisdictions to promote the preservation of these fisheries and their protection against overfishing, waste, depletion or any abuse whatsoever, and to assure a continuing yield from the fishery resources of the aforementioned States. To that end the commission shall draft and recommend to the
Governors and Legislatures of the various signatory States, legislation dealing with the conservation of the marine, shell and anadromous fisheries of the Gulf seacoast. The commission shall from time to time present to the Governor of each compacting State its recommendations relating to enactments to be presented to the Legislature of that State in furthering the interest and purposes of this compact. The commission shall consult with and advise the pertinent administrative agencies in the States party hereto with regard to problems connected with the fisheries, and recommend the adoption of such regulations as it deems advisable. The commission shall have power to recommend to the States party hereto the stocking of the waters of such States with fish and fish eggs or joint stocking by some or all of the States party hereto, and when two or more States shall jointly stock waters the commission shall act as the coordinating agency for such stocking.

ARTICLE V

The commission shall elect from its number a chairman and vice-chairman and shall appoint, and at its pleasure remove or discharge, such officers and employees as may be required to carry the provisions of this compact into effect and shall fix and determine their duties, qualifications and compensation. Said commission shall adopt rules and regulations for the conduct of its business. It may establish and maintain one or more offices for the transaction of its business, and may meet at any time or place; but must meet at least once a year.

ARTICLE VI

No action shall be taken by the commission in regard to its general affairs except by the affirmative vote of a majority of the whole number of compacting States. No recommendation shall be made by the commission in regard to any species of fish except by the affirmative vote of a majority of the compacting States which have an interest in such species. The commission shall define what shall be an interest.

ARTICLE VII

The Fish and Wildlife Service of the Department of the Interior of the Government of the United States shall act as the primary research agency of the Gulf States Marine Fisheries Commission, cooperating with the research agencies in each State for that purpose. Representatives of the said Fish and Wildlife Service shall attend the meetings of the commission. An advisory committee to be representative of the commercial salt water fishermen and the salt water anglers and such other interests of each State as the commissioners deem advisable may be established by the commissioners from each State for the purpose of advising those commissioners upon such recommendations as it may desire to make.

ARTICLE VIII

When any State, other than those named specifically in Article II of this compact, shall become a party hereto for the purpose of conserving its anadromous fish or marine species in accordance with the provisions of Article II, the participation of such State in the action of the commission shall be limited to such species of fish.

ARTICLE IX

Nothing in this compact shall be construed to limit the powers of the proprietary interest of any signatory State, or to repeal or prevent the enactment of any legislation or the enforcement of any requirement by a signatory State, imposing additional conditions and restrictions to conserve its fisheries.

ARTICLE X

It is agreed that any two or more States party hereto may further amend this compact by acts of their respective Legislatures, subject to approval of Congress as provided in Article I, Section X, of the Constitution of the United States, to designate the Gulf States Marine Fisheries Commission as a joint regulating authority for the joint regulation of specific fisheries affecting only such States as shall so compact, and at their joint expense. The representatives of such States shall constitute a separate section of the Gulf States Marine Fisheries Commission for the exercise of the additional powers so granted, but the creation of such section shall not be deemed to deprive the States so compacting of any of their privileges or powers in the Gulf States Marine Fisheries Commission as constituted under the other Articles of this compact.

ARTICLE XI

Continued absence of representation or of any representative on the commission from any State party hereto, shall be brought to the attention of the Governor thereof.

CHAPTER 2. BURDEN OF PROOF

§ 2.05. Presumption

When this code or another penal law establishes a presumption with respect to any fact, it has the following consequences:

(1) if there is sufficient evidence of the facts that give rise to the presumption, the issue of the existence of the presumed fact must be submitted to the jury, unless the court is satisfied that the evidence as a whole clearly precludes a finding beyond a reasonable doubt of the presumed fact; and

(2) if the existence of the presumed fact is submitted to the jury, the court shall charge the jury, in terms of the presumption and the specific element to which it applies, as follows:

(A) that the facts giving rise to the presumption must be proven beyond a reasonable doubt;

(B) that if such facts are proven beyond a reasonable doubt the jury may find that the element of the offense sought to be presumed exists, but it is not bound to so find;

(C) that even though the jury may find the existence of such element, the state must prove beyond a reasonable doubt each of the other elements of the offense charged; and

(D) if the jury has a reasonable doubt as to the existence of a fact or facts giving rise to the presumption, the presumption fails and the jury shall not consider the presumption for any purpose.

[Savings provisions. Section 17 of the 1975 Act provided:

“(a) Except as provided in Subsections (b) and (c) of this section, this Act applies only to offenses committed on or after its effective date, and a criminal action for an offense committed before this Act's effective date is governed by the law existing before the effective date, which law is continued in effect for this purpose, as if this Act were not in force. For purposes of this section, an offense is committed on or after the effective date of this Act if any element of the offense occurs on or after the effective date.

(b) Conduct constituting an offense under existing law that is repealed by this Act and that does not constitute an offense under this Act may not be prosecuted after the effective date of this Act. If, on the effective date of this Act, a criminal action is pending for conduct that was an offense under the laws repealed by this Act and that does not constitute an offense under this Act, the action is dismissed on the effective date of this Act. However, a conviction existing on the effective date of this Act for conduct constituting an offense under laws repealed by this Act is valid and unaffected by this Act. For purposes of this section, "conviction" means a finding of guilt in a court of competent jurisdiction, and it is of no consequence that the conviction is not final.

“(c) In a criminal action pending on or commenced on or after the effective date of this Act, for an offense committed before the effective date, the defendant, if adjudged guilty, shall be assessed punishment under this Act if he so elects by written motion filed with the trial court before the sentencing hearing begins.”]

[See Compact Edition, Volume 1 for text of (a)]

TITLE 4. INCHOATE OFFENSES

CHAPTER 15. PREPARATORY OFFENSES

§ 15.01. Criminal Attempt

(a) A person commits an offense if, with specific intent to commit an offense, he does an act amounting to more than mere preparation that tends but fails to effect the commission of the offense intended.

(b) If a person attempts an offense that may be aggravated, his conduct constitutes an attempt to commit the aggravated offense if an element that aggravates the offense accompanies the attempt.

(c) It is no defense to prosecution for criminal attempt that the offense attempted was actually committed.

(d) An offense under this section is one category lower than the offense attempted, and if the offense attempted is a felony of the third degree, the offense is a Class A misdemeanor.

[Amended by Acts 1975, 64th Leg., p. 478, ch. 203, § 4, eff. Sept. 1, 1975.]

Subsection (a) of the 1975 amendatory act provided:
"Sections 1, 2, and 4 of this Act apply only to offenses committed on or after the effective date of this Act, and except as provided in Subsections (b), (c), and (d) of this section, a criminal action for an offense committed before the effective date of this Act is governed by the law existing before the effective date, which law is continued in effect for this purpose as though this law were not in force."

CHAPTER 16. CRIMINAL INSTRUMENTS AND INTERCEPTION OF WIRE OR ORAL COMMUNICATION

The heading of the chapter was amended by Acts 1981, 67th Leg., p. 740, ch. 275, § 3, effective until September 1, 1985.
§ 16.01  Unlawful Use of Criminal Instrument

(a) A person commits an offense if:

(1) he possesses a criminal instrument with intent to use it in the commission of an offense; or

(2) with knowledge of its character and with intent to use or aid or permit another to use in the commission of an offense, he manufactures, adapts, sells, installs, or sets up a criminal instrument.

(b) For the purpose of this section, “criminal instrument” means anything, the possession, manufacture, or sale of which is not otherwise an offense, that is specially designed, made, or adapted for use in the commission of an offense.

(c) An offense under Subsection (a)(1) of this section is one category lower than the offense intended.

An offense under Subsection (a)(2) of this section is a felony of the third degree.

§ 16.02  Unlawful Interception, Use, or Disclosure of Wire or Oral Communications

Text of section added effective until September 1, 1985

(a) In this section, “covert entry,” “communication common carrier,” “contents,” “electronic, mechanical, or other device,” “intercept,” “investigative or law enforcement officer,” “oral communication,” and “wire communication” have the meanings given those terms in Article 18.20, Code of Criminal Procedure, 1965.

(b) Except as specifically provided by Subsection (c) of this section, a person commits an offense if he:

(1) knowingly or intentionally intercepts, endeavors to intercept, or procures another person to intercept or endeavor to intercept a wire or oral communication;

(2) knowingly or intentionally discloses or endeavors to disclose to another person the contents of a wire or oral communication if he knows or is reckless about whether the information was obtained through the interception of a wire or oral communication in violation of this subsection;

(3) knowingly or intentionally uses or endeavors to use the contents of a wire or oral communication if he knows or is reckless about whether the information was obtained through the interception of a wire or oral communication in violation of this subsection; or

(4) knowingly or intentionally effects a covert entry for the purpose of intercepting wire or oral communications without court order or authorization.

(c) It is an affirmative defense to the application of Subsection (b) of this section that:

(1) an operator of a switchboard or an officer, employee, or agent of a communication common carrier whose facilities are used in the transmission of a wire communication intercepts a communication or discloses or uses an intercepted communication in the normal course of employment while engaged in an activity that is a necessary incident to the rendition of service or to the protection of the rights or property of the carrier of the communication, unless the interception results from the communication common carrier’s use of service observing or random monitoring for purposes other than mechanical or service quality control checks;

(2) an officer, employee, or agent of a communication common carrier provides information, facilities, or technical assistance to an investigative or law enforcement officer who is authorized as provided by this article to intercept a wire or oral communication;

(3) a person acting under color of law intercepts a wire or oral communication if the person is a party to the communication or if one of the parties to the communication has given prior consent to the interception; or

(4) a person not acting under color of law intercepts a wire or oral communication if the person is a party to the communication or if one of the parties to the communication has given prior consent to the interception unless the communication is intercepted for the purpose of committing any criminal or tortious act in violation of the constitutional or statutory laws of the United States or of this state or for the purpose of committing any other injurious act.

(d) Except as provided by Subsection (e) of this section, a person commits an offense if he knowingly or intentionally manufactures, assembles, possesses, sells, sends, or carries an electronic, mechanical, or other device that is designed primarily for nonconsensual interception of wire or oral communications.

(e) It is an affirmative defense to the application of Subsection (d) of this section that the manufacturer, assembly, possession, sale, sending, or carrying of an electronic, mechanical, or other device that is designed primarily for the purpose of nonconsensual interception of wire or oral communications is by:

(1) a communication common carrier or an officer, agent, or employee of or a person under contract with a communication common carrier acting in the normal course of the communication carrier’s business; or

(2) an officer, agent, or employee of a person under contract with, bidding on contracts with, or doing business with the United States or this state acting in the normal course of the activities of the United States or this state.

(f) An offense under this section is a felony of the second degree.
An electronic, mechanical, or other device that is used, manufactured, assembled, possessed, sold, sent, or carried in violation of this section may be seized by a peace officer pursuant to executing a lawful search or arrest.

(h) Property seized pursuant to this section may be forfeited to the Department of Public Safety in the manner provided by Article 18.18, Code of Criminal Procedure, 1965, as amended, for disposition of seized property. The department may destroy the property or maintain, repair, use, and operate the property in a manner consistent with Article 18.20, Code of Criminal Procedure, 1965.

Section 5 of the 1981 Act provides: "This Act shall not be in force after September 1, 1985."

1. that a specific offense has been committed;
2. that a specifically described person has been a victim of the offense;
3. that evidence of the offense or evidence that a particular person committed the offense can be detected by photographic means; and
4. that the person to be searched for and photographed is located at the particular place to be searched.

(b) The officer executing the warrant may be accompanied by a photographer who is employed by a law enforcement agency and who acts under the direction of the officer executing the warrant. The photographer is entitled to access to the child in the same manner as the officer executing the warrant.

(c) In addition to the requirements of Subdivisions (1) and (4) of Article 18.04 of this code, a warrant issued under this article shall identify, as near as may be, the child to be located and photographed, shall name or describe, as near as may be, the place or thing to be searched, and shall command any peace officer of the proper county to search for and cause the child to be photographed.

The officer who seized the property shall retain custody of it until the magistrate issues an order directing the manner of safekeeping the property. The contents of an intercepted communication and evidence derived from an intercepted communication may be received in a civil trial, hearing, or other proceeding only if the civil trial, hearing, or other proceeding arises out of a violation of the Penal Code, Code of Criminal Procedure, Controlled Substances Act, or Dangerous Drug Act.

Judges Authorized to Consider Interception Applications

Sec. 3. (a) The presiding judge of the court of criminal appeals, by order filed with the clerk of that court, shall appoint one district judge from each of the administrative judicial districts of this state to serve at his pleasure as the judge of competent jurisdiction within that administrative judicial district. The presiding judge shall fill vacancies, as they occur, in the same manner.

(b) Except as provided by Subsection (c) of this section, only the judge of competent jurisdiction for the administrative judicial district in which the proposed interception will be made may act on an application for authorization to intercept wire or oral communications.

(c) If the judge of competent jurisdiction for an administrative judicial district is absent or unable to serve or if exigent circumstances exist, the application may be made to the judge of competent jurisdiction in an adjacent administrative judicial district. Exigent circumstances does not include a denial of a previous application on the same facts and circumstances. To be valid, the application must fully explain the circumstances justifying application under this subsection.

Offenses for Which Interceptions may be Authorized

Sec. 4. A judge may issue an order authorizing interception of wire or oral communications only if the prosecutor applying for the order shows probable cause to believe that the interception will provide evidence of the commission of a felony (other than felony possession of marihuana) under the Texas Controlled Substances Act (Article 4476–15, Vernon's Texas Civil Statutes) or of a felony under the Texas Dangerous Drug Act (Article 4476–14, Vernon's Texas Civil Statutes).

Control of Intercepting Devices

Sec. 5. (a) Only the Department of Public Safety is authorized by this article to own, possess, install, operate, or monitor an electronic, mechanical, or other device. The Department of Public Safety may be assisted by an investigative or law enforcement officer in the operation and monitoring of an interception of wire or oral communications, provided that a commissioned officer of the Department of Public Safety is present at all times.

(b) The director shall designate in writing the commissioned officers of the Department of Public Safety who are responsible for the possession, installation, operation, and monitoring of electronic, mechanical, or other devices for the department.

Request for Application for Interception

Sec. 6. (a) The director may, based on written affidavits, request in writing that a prosecutor apply for an order authorizing interception of wire or oral communications.

(b) The head of a local law enforcement agency or, if the head of the local law enforcement agency is absent or unable to serve, the acting head of the local law enforcement agency may, based on written affidavits, request in writing that a prosecutor apply for an order authorizing interception of wire or oral communications. Prior to the requesting of an ap-
application under this subsection, the head of a local law enforcement agency must submit the request and supporting affidavits to the director, who shall make a finding in writing whether the request and supporting affidavits establish that other investigative procedures have been tried and failed or they reasonably appear unlikely to succeed or to be too dangerous if tried, is feasible, is justifiable, and whether the Department of Public Safety has the necessary resources available. The prosecutor may file the application only after a written positive finding on all the above requirements by the director.

Authorization for Disclosure and Use of Intercepted Communications

Sec. 7. (a) An investigative or law enforcement officer who, by any means authorized by this article, obtains knowledge of the contents of a wire or oral communication or evidence derived from the communication may disclose the contents or evidence to another investigative or law enforcement officer to the extent that the disclosure is appropriate to the proper performance of the official duties of the officer making or receiving the disclosure.

(b) An investigative or law enforcement officer who, by any means authorized by this article, obtains knowledge of the contents of a wire or oral communication or evidence derived from the communication may use the contents or evidence to the extent the use is appropriate to the proper performance of his official duties.

(c) A person who receives, by any means authorized by this article, information concerning a wire or oral communication or evidence derived from a communication intercepted in accordance with the provisions of this article may disclose the contents of that communication or the derivative evidence while giving testimony under oath in any proceeding held under the authority of the United States, of this state, or of a political subdivision of this state.

(d) An otherwise privileged wire or oral communication intercepted in accordance with, or in violation of, the provisions of this article does not lose its privileged character and any evidence derived from such privileged communication against the party to the privileged communication shall be considered privileged also.

(e) When an investigative or law enforcement officer, while engaged in intercepting wire or oral communications in a manner authorized by this article, intercepts wire or oral communications relating to offenses other than those specified in the order of authorization, the contents of and evidence derived from the communication may be disclosed or used as provided by Subsections (a) and (b) of this section. Such contents and any evidence derived therefrom may be used under Subsection (c) of this section when authorized by a judge of competent jurisdiction where the judge finds, on subsequent application, that the contents were otherwise intercepted in accordance with the provisions of this article. The application shall be made as soon as practicable.

Application for Interception Authorization

Sec. 8. (a) To be valid, an application for an order authorizing the interception of a wire or oral communication must be made in writing under oath to a judge of competent jurisdiction and must state the applicant's authority to make the application. An applicant must include the following information in the application:

1. the identity of the prosecutor making the application and of the officer requesting the application;
2. a full and complete statement of the facts and circumstances relied on by the applicant to justify his belief that an order should be issued, including:
   A. details about the particular offense that has been, is being, or is about to be committed;
   B. a particular description of the nature and location of the facilities from which or the place where the communication is to be intercepted;
   C. a particular description of the type of communication sought to be intercepted; and
   D. the identity of the person, if known, committing the offense and whose communications are to be intercepted;
3. a full and complete statement as to whether or not other investigative procedures have been tried and failed or why they reasonably appear to be unlikely to succeed or to be too dangerous if tried;
4. a statement of the period of time for which the interception is required to be maintained and, if the nature of the investigation is such that the authorization for interception should not automatically terminate when the described type of communication is first obtained, a particular description of facts establishing probable cause to believe that additional communications of the same type will occur after the described type of communication is obtained;
5. a statement whether or not a covert entry will be necessary to properly and safely install the wiretapping or electronic surveillance or eavesdropping equipment; if a covert entry is requested, a statement as to why such an entry is necessary and proper under the facts of the particular investigation shall be required;
6. a full and complete statement of the facts concerning all applications known to the prosecutor making the application that have been previously made to a judge for authorization to intercept wire or oral communications involving any of the persons, facilities, or places specified in the application and of the action taken by the judge on each application; and
(7) if the application is for the extension of an order, a statement setting forth the results already obtained from the interception or a reasonable explanation of the failure to obtain results.

(b) The judge may, in an ex parte hearing in chambers, require additional testimony or documentary evidence in support of the application, and such testimony or documentary evidence shall be preserved as part of the application.

**Action on Application for Interception Order**

Sec. 9. (a) On receipt of an application, the judge may enter an ex parte order, as requested or as modified, authorizing interception of wire or oral communications if the judge determines from the evidence submitted by the applicant that:

1. there is probable cause to believe that a person is committing, has committed, or is about to commit a particular offense enumerated in Section 4 of this article;
2. there is probable cause to believe that particular communications concerning that offense will be obtained through the interception;
3. normal investigative procedures have been tried and have failed or reasonably appear to be unlikely to succeed or to be too dangerous if tried; and
4. there is probable cause to believe that the facilities from which or the place where the wire or oral communications are to be intercepted are being used or are about to be used in connection with the commission of an offense or are leased to, listed in the name of, or commonly used by the person;
5. a covert entry is or is not necessary to properly and safely install the wiretapping or electronic surveillance or eavesdropping equipment.

(b) An order authorizing the interception of a wire or oral communication must specify:

1. the identity of the person, if known, whose communications are to be intercepted;
2. the nature and location of the communications facilities as to which or the place where authority to intercept is granted;
3. a particular description of the type of communication sought to be intercepted and a statement of the particular offense to which it relates;
4. the identity of the officer making the request and the identity of the prosecutor;
5. the time during which the interception is authorized, including a statement of whether or not the interception will automatically terminate when the described communication is first obtained; and
6. whether or not a covert entry or surreptitious entry is necessary to properly and safely install wiretapping, electronic surveillance, or eavesdropping equipment.

(e) In an order authorizing the interception of a wire or oral communication, the judge issuing it, on request of the applicant, shall direct that a communication common carrier, landlord, custodian, or other person furnish the applicant all information, facilities, and technical assistance necessary to accomplish the interception unobtrusively and with a minimum of interference with the services that the carrier, landlord, custodian, or other person is providing the person whose communications are to be intercepted. Any communication common carrier, landlord, custodian, or other person furnishing facilities or technical assistance is entitled to compensation by the applicant for the facilities or assistance at the prevailing rates.

(d) An order entered pursuant to this section may not authorize the interception of a wire or oral communication for longer than is necessary to achieve the objective of the authorization and in no event may it authorize interception for more than 30 days. The issuing judge may grant extensions of an order, but only on application for an extension made in accordance with Section 8 of this article and the court making the findings required by Subsection (a) of this section. The period of extension may not be longer than the authorizing judge deems necessary to achieve the purposes for which it is granted an in no event may the extension be for more than 30 days. To be valid, each order and extension of an order must provide that the authorization to intercept be executed as soon as practicable, be conducted in a way that minimizes the interception of communications not otherwise subject to interception under this article, and terminate on obtaining the authorized objective or within 30 days, whichever occurs sooner.

(e) Whenever an order authorizing interception is entered pursuant to this article, the order may require reports to the judge who issued the order showing what progress has been made toward achievement of the authorized objective and the need for continued interception. Reports shall be made at any interval the judge requires.

(f) A judge who issues an order authorizing the interception of a wire or oral communication may not hear a criminal prosecution in which evidence derived from the interception may be used or in which the order may be an issue.

**Procedure for Preserving Intercepted Communications**

Sec. 10. (a) The contents of a wire or oral communication intercepted by means authorized by this article shall be recorded on tape, wire, or other comparable device. The recording of the contents of a wire or oral communication under this subsection shall be done in a way that protects the recording from editing or other alterations.
(b) Immediately on the expiration of the period of
the order and all extensions, if any, the recordings
shall be made available to the judge issuing the
order and sealed under his directions. Custody of
the recordings shall be wherever the judge orders.
The recordings may not be destroyed until at least
10 years after the date of expiration of the order
and the last extension, if any. A recording may be
destroyed only by order of the judge of competent
jurisdiction for the administrative judicial district in
which the interception was authorized.

(c) Duplicate recordings may be made for use or
disclosure pursuant to Subsections (a) and (b), Sec­
tion 7, of this article for investigations.

(d) The presence of the seal required by Subsec­
tion (b) of this section or a satisfactory explanation
of its absence is a prerequisite for the use or disclo­
sure of the contents of a wire or oral communication
or evidence derived from the communication under
Subsection (c), Section 7, of this article.

Sealing of Orders and Applications

Sec. 11. The judge shall seal each application
made and order granted under this article. Custody
of the applications and orders shall be wherever the
judge directs. An application or order may be dis­
closed only on a showing of good cause before a
judge of competent jurisdiction and may not be
destroyed until at least 10 years after the date it is
sealed. An application or order may be destroyed
only by order of the judge of competent jurisdiction
for the administrative judicial district in which it
was made or granted.

Contempt

Sec. 12. A violation of Section 10 or 11 of this
article may be punished as contempt of court.

Notice and Disclosure of Interception to a Party

Sec. 13. (a) Within a reasonable time but not
later than 90 days after the date an application for
an order is denied or after the date an order or the
last extension, if any, expires, the judge who grant­
ed or denied the application shall cause to be served
on the persons named in the order or the applica­tion
and any other parties to intercepted communications,
if any, an inventory, which must include no­
tice:

(1) of the entry of the order or the applica­tion;
(2) of the date of the entry and the period of
authorized interception or the date of denial of
the application; and
(3) that during the authorized period wire or
oral communications were or were not intercept­
ed.

(b) The judge, on motion, may in his discretion
make available to a person or his counsel for inspec­tion
any portion of an intercepted communication,
application, or order that the judge determines, in
the interest of justice, to disclose to that person.

(c) On an ex parte showing of good cause to the
judge, the serving of the inventory required by this
section may be postponed, but in no event may any
evidence derived from an order under this article be
disclosed in any trial, until after such inventory has
been served.

Preconditions to Use as Evidence

Sec. 14. (a) The contents of an intercepted wire
or oral communication or evidence derived from
the communication may not be received in evidence or
otherwise disclosed in a trial, hearing, or other pro­
cceeding in a federal or state court unless each party,
not later than the 10th day before the date of the
trial, hearing, or other proceeding, has been fur­
nished with a copy of the court order and application
under which the interception was authorized or ap­
proved. This 10-day period may be waived by the
judge if he finds that it is not possible to furnish the
party with the information 10 days before the trial,
hearing, or proceeding and that the party will not be
prejudiced by the delay in receiving the information.

(b) An aggrieved person charged with an offense
in a trial, hearing, or proceeding in or before a court,
department, officer, agency, regulatory body, or oth­
er authority of the United States or of this state or a
political subdivision of this state may move to sup­
press the contents of an intercepted wire or oral
communication or evidence derived from the commu­
ication on the ground that:

(1) the communication was unlawfully inter­
cepted;
(2) the order authorizing the interception is
insufficient on its face; or
(3) the interception was not made in conform­
ity with the order.

(c) A person identified by a party to an intercep­
ted wire or oral communication during the course of
that communication may move to suppress the con­
tents of the communication on the grounds provided
in Subsection (b) of this section or on the ground
that the harm to the person resulting from his
identification in court exceeds the value to the pro­
secution of the disclosure of the contents.

(d) The motion to suppress must be made before
the trial, hearing, or proceeding unless there was no
opportunity to make the motion or the person was
not aware of the grounds of the motion. The hear­
ing on the motion shall be held in camera upon the
written request of the aggrieved person. If the
motion is granted, the contents of the intercepted
wire or oral communication and evidence derived
from the communication shall be treated as having
been obtained in violation of this article. The judge,
on the filing of the motion by the aggrieved person,
shall make available to the aggrieved person or his
counsel for inspection any portion of the intercepted
communication or evidence derived from the com­
ication that the judge determines, in the interest of
justice, to make available.
(e) Any judge of this state, upon hearing a pre-trial motion regarding conversation intercepted by wire pursuant to this article, or who otherwise becomes informed that there exists on such intercepted wire or oral communication identification of a specific individual who is not a party or suspect to the subject of interception:

(1) shall give notice and an opportunity to be heard on the matter of suppression of references to that person if identification is sufficient so as to give notice; or
(2) shall suppress references to that person if identification is sufficient to potentially cause embarrassment or harm which outweighs the probative value, if any, of the mention of such person, but insufficient to require the notice provided for in Subdivision (1), above.

Reports Concerning Intercepted Wire or Oral Communications
Sec. 15. (a) Within 30 days after the date an order or the last extension if any, expires or after the denial of an order, the issuing or denying judge shall report to the Administrative Office of the United States Courts:

(1) the fact that an order or extension was applied for;
(2) the kind of order or extension applied for;
(3) the fact that the order or extension was granted as applied for, was modified, or was denied;
(4) the period of interceptions authorized by the order and the number and duration of any extensions of the order;
(5) the offense specified in the order or application or extension;
(6) the identity of the officer making the request and the prosecutor; and
(7) the nature of the facilities from which or the place where communications were to be intercepted.

(b) In January of each year each prosecutor shall report to the Administrative Office of the United States Courts the following information for the preceding calendar year:

(1) the information required by Subsection (a) of this section with respect to each application for an order or extension made;
(2) a general description of the interceptions made under each order or extension, including the approximate nature and frequency of incriminating communications intercepted, the approximate nature and frequency of other communications intercepted, the approximate number of persons whose communications were intercepted, and the approximate nature, amount, and cost of the manpower and other resources used in the interceptions;
(3) the number of arrests resulting from interceptions made under each order or extension and the offenses for which arrests were made;
(4) the number of trials resulting from interceptions;
(5) the number of motions to suppress made with respect to interceptions and the number granted or denied;
(6) the number of convictions resulting from interceptions, the offenses for which the convictions were obtained, and a general assessment of the importance of the interceptions; and
(7) the information required by Subdivisions (2) through (6) of this subsection with respect to orders or extensions obtained.

c) Any judge or prosecutor required to file a report with the Administrative Office of the United States Courts shall forward a copy of such report to the director of the Department of Public Safety. On or before March 1 of each year, the director shall submit to the governor; lieutenant governor; speaker of the house of representatives; chairman, senate jurisprudence committee; and chairman, house of representatives criminal jurisprudence committee a report of all intercepts as defined herein conducted pursuant to this article and terminated during the preceding calendar year. Such report shall include:

(1) the reports of judges and prosecuting attorneys forwarded to the director as required in this section;
(2) the number of Department of Public Safety personnel authorized to possess, install, or operate electronic, mechanical, or other devices;
(3) the number of Department of Public Safety and other law enforcement personnel who participated or engaged in the seizure of intercepts pursuant to this article during the preceding calendar year; and
(4) the total cost to the Department of Public Safety of all activities and procedures relating to the seizure of intercepts during the preceding calendar year, including costs of equipment, manpower, and expenses incurred as compensation for use of facilities or technical assistance provided to the department.

Recovery of Civil Damages Authorized
Sec. 16. (a) A person whose wire or oral communication is intercepted, disclosed, or used in violation of this article has a civil cause of action against any person who intercepts, discloses, or uses or procures another person to intercept, disclose, or use the communication and is entitled to recover from the person:

(1) actual damages but not less than liquidated damages computed at a rate of $100 a day for each day of violation or $1,000, whichever is higher;
(2) punitive damages; and
(3) a reasonable attorney’s fee and other litigation costs reasonably incurred.
(b) A good faith reliance on a court order or legislative authorization constitutes a complete defense to any civil or criminal action brought under this article.

Exceptions

Sec. 17. It is an exception to the application of Section 16 that:

(1) an operator of a switchboard or an officer, employee, or agent of a communication common carrier whose facilities are used in the transmission of a wire communication intercepts a communication or discloses or uses an intercepted communication in the normal course of employment while engaged in an activity that is a necessary incident to the rendition of service or to the protection of the rights or property of the carrier of the communication, unless the interception results from the communication common carrier's use of service observing or random monitoring for purposes other than mechanical or service quality control checks;

(2) an officer, employee, or agent of a communication common carrier provides information, facilities, or technical assistance to an investigative or law enforcement officer who is authorized as provided by this article to intercept a wire or oral communication;

(3) a person acting under color of law intercepts a wire or oral communication if the person is a party to the communication or if one of the parties to the communication has given prior consent to the interception; or

(4) a person not acting under color of law intercepts a wire or oral communication if the person is a party to the communication or if one of the parties to the communication has given prior consent to the interception unless the communication is intercepted for the purpose of committing any criminal or tortious act in violation of the constitution or laws of the United States or of this state or for the purpose of committing any other injurious act.

Section 5 of the 1981 Act provides: “This Act shall not be in force after September 1, 1985.”

(a) For each day or a fractional part thereof in court representing the accused, a reasonable fee to be set by the court but in no event to be less than $50;

(b) For each day in court representing the accused in a capital case, a reasonable fee to be set by the court but in no event to be less than $250;

(c) For each day or a fractional part thereof in court representing the indigent in a habeas corpus hearing, a reasonable fee to be set by the court but in no event to be less than $50;

(d) For expenses incurred for purposes of investigation and expert testimony, a reasonable fee to be set by the court but in no event to exceed $500;

(e) For the prosecution to a final conclusion of a bona fide appeal to a court of appeals or the Court of Criminal Appeals, a reasonable fee to be set by the court but in no event to be less than $350;

(f) For the prosecution to a final conclusion of a bona fide appeal to the Court of Criminal Appeals in a case where the death penalty has been assessed, a reasonable fee to be set by the court but in no event to be less than $500.

Sec. 2. The minimum fee will be automatically allowed unless the trial judge orders more within five days of the judgment.

Sec. 3. All payments made under the provisions of this Article may be included as costs of court.

Sec. 4. An attorney may not receive more than one fee for each day in court, regardless of the number of cases in which he appears as appointed counsel on the same day.

Sec. 1. A county in which a facility of the Texas Department of Corrections is located shall pay from its general fund only the first $250 of the aggregate sum allowed and awarded by the court for attorneys' fees, investigation, and expert testimony under Article 26.05 toward defending a prisoner committed to that facility who is being prosecuted for an offense committed in that county while in the custody of the department if the prisoner was originally committed for an offense committed in another county.

Sec. 2. If the fees awarded for court-appointed counsel in a case covered by Section 1 of this article exceed $250, the court shall certify the amount in excess of $250 to the Comptroller of Public Accounts of the State of Texas. The comptroller shall issue a warrant to the court-appointed counsel in the amount certified to the comptroller by the court.

[Added by Acts 1975, 64th Leg., p. 168, ch. 72, § 1, eff. Sept. 1, 1975.]

Art. 26.13. Plea of Guilty

(a) Prior to accepting a plea of guilty or a plea of nolo contendere, the court shall admonish the defendant of:

(1) the range of the punishment attached to the offense;

(2) the fact that the recommendation of the prosecuting attorney as to punishment is not binding on the court. Provided that the court shall inquire as to the existence of any plea bargaining agreements between the state and the defendant and, in the event that such an agreement exists, the court shall inform the defendant whether it will follow or reject such agreement in open court and before any finding on the plea. Should the court reject any such agreement, the defendant shall be permitted to withdraw his plea of guilty or nolo contendere, and neither the fact that the defendant had entered a plea of guilty or nolo contendere nor any statements made by him at the hearing on the plea of guilty or nolo contendere may be used against the defendant on the issue of guilt or punishment in any subsequent criminal proceeding; and

(3) the fact that if the punishment assessed does not exceed the punishment recommended by the prosecutor and agreed to by the defendant and his attorney, the trial court must give its permission to the defendant before he may prosecute an appeal on any matter in the case except for those matters raised by written motions filed prior to trial.

(b) No plea of guilty or plea of nolo contendere shall be accepted by the court unless it appears that the defendant is mentally competent and the plea is free and voluntary.

(c) In admonishing the defendant as herein provided, substantial compliance by the court is sufficient, unless the defendant affirmatively shows that he was not aware of the consequences of his plea and that he was misled or harmed by the admonishment of the court.

For saving provisions of 1975 amendatory act, see note set out under art. 3.01.

CHAPTER TWENTY-SEVEN. THE PLEADING IN CRIMINAL ACTIONS

Art. 27.14. Plea of Guilty or Nolo Contendere in Misdemeanor

(a) A plea of "guilty" or a plea of "nolo contendere" in a misdemeanor case may be made either by the defendant or his counsel in open court; in such case, the defendant or his counsel may waive a jury,
and the punishment may be assessed by the court either upon or without evidence, at the discretion of the court.

(b) A defendant charged with a misdemeanor for which the maximum possible punishment is by fine only may, in lieu of the method provided in Subsection (a) of this article, mail to the court a plea of "guilty" or a plea of "nolo contendere" and a waiver of jury trial. The defendant may also request in writing that the court notify the defendant, at the address stated in the request, of the amount of an appeal bond that the court will approve. If the court receives a plea and waiver before the time the defendant is scheduled to appear in court, the court shall dispose of the case without requiring a court appearance by the defendant. The court shall notify the defendant, at the address stated in the request, of the amount of any fine assessed in the case and, if requested by the defendant, the amount of an appeal bond that the court will approve. The defendant shall pay any fine assessed or give an appeal bond in the amount stated in the notice before the 31st day after receiving the notice.

(c) In a misdemeanor case arising out of a moving traffic violation for which the maximum possible punishment is by fine only, payment of a fine, or an amount accepted by the court constitutes a finding of guilty in open court, as though a plea of nolo contendere had been entered by the defendant.

Section 4 of the 1979 amendatory act provided:
"This Act applies only to appeal bonds given for an appeal from a sentence of a justice or municipal court rendered on or after the effective date of this Act. The sufficiency of an appeal bond for an appeal from a sentence of a justice or municipal court rendered before the effective date of this Act is governed by the law amended by this Act as it existed at the time the sentence was rendered, and that law is continued in effect for this purpose as if this Act were not in force."

Art. 27.16. Plea of Not Guilty, How Made
(a) The plea of not guilty may be made orally by the defendant or by his counsel in open court. If the defendant refuses to plead, the plea of not guilty shall be entered for him by the court.

(b) A defendant charged with a misdemeanor for which the maximum possible punishment is by fine only may, in lieu of the method provided in Subsection (a) of this article, mail to the court a plea of not guilty.

[Amended by Acts 1977, 65th Leg., p. 2143, ch. 858, § 2, eff. June 16, 1977.]

The defendant must be present at the arraignment, and his presence is required during any pre-trial proceeding. The pre-trial hearing shall be to determine any of the following matters:

(7) Motions for change of venue by the State or the defendant; provided, however, that such motions for change of venue, if overruled at the pre-trial hearing, may be renewed by the State or the defendant during the voir dire examination of the jury;
(8) Discovery;
(9) Entrapment; and
(10) Motion for appointment of interpreter.

Sec. 2. When a criminal case is set for such pre-trial hearing, any such preliminary matters not raised or filed seven days before the hearing will not thereafter be allowed to be raised or filed, except by permission of the court for good cause shown; provided that the defendant shall have sufficient notice of such hearing to allow him not less than 10 days in which to raise or file such preliminary matters. The record made at such pre-trial hearing, the rulings of the court and the exceptions and objections thereto shall become a part of the trial record of the case upon its merits.
